London, Oct. 7.—Sir James Connolly, agent-general in London for Western Australia, replying to a statement made by Hon. William Hughes, prime minister of Australia, wherein the premier discounted the possibility of Australia being able to absorb 100,000 immigrants yearly, declares that this number represents not the maximum when conditions become more settled. Western Australia, says the agent-general, even this year has been absorbing immigrants on a ratio which would represent for the whole commonwealth more than the number quoted.

Montreal, Oct. 11—According to the opinion of a prominent grain official, wheat prices are about due for another drop, and he is convinced that "dollar wheat is not far off. "The depression is akin to that in evidence in every industrial field," he said. "There is no demand

Candidate Chosen for Strathcona

D. W. Warner is Farmers' Choice

Wetaskiwin, October 6.—D. W. Warner, of Clover Bar, was the choice of the U.F.A. convention, held here yesterday, to select a candidate for the Strathcona constituency in the forthcoming federal contest. Eight candidates were placed in nomination, and it was not until the fifth vote had been counted that the result was known.

Rice Sheppard lead in the vote until the last ballot, when Mr Warner defeated him by seven. The convention was the largest ever held by the Farmers in this constituency, there being 103 votes cast during the election. The newly elected candidate expressed himself as an unqualified supporter of the U.F.A. platform, and the convention passed a resolution to the effect that the recall should be resorted to in the event of their candidate, if elected, not complying with the wishes of his constituents.

Mr Warner is very well known in this district, as indeed throughout the constituency, and will no doubt ably uphold the Farmer cause during the campaign.

RED DEER LIBERAL CONVENTION

Some free speech was indulged in at the Red Deer Liberal convention, held at Lacombe on Friday, when Dr. Clark received the nomination but refused to be the candidate. The convention adjourned without electing a candidate, and throughout the proceedings were far from harmonious. This from the Morning Albertan—"The convention was replete with interesting features. It was the first Liberal convention in Alberta to hear open declarations that the defeat of the Farmer party was the big issue with the Liberals and not the defeat of the Meighen government: and the first Liberal convention to hear any suggestion that there should be a union of Conservatives and Liberal forces to accomplish this end.

"But E. H. Prudden, defeated member of the legislature for the local riding of Stettler, gave the game away when he declared, in a speech of half a minute, that 'this thing we are fighting was vicious and undemocratic, and I will support any candidate you may like to select,' sitting down without making definite references, and it remained for W. F. Puffer, three-defeated candidate in Lacombe riding, to say what Mr Prudden had forgotten to say, that 'the vicious thing' was not the Meighen government but the Farmer party. Mr Puffer launched into a tirade against the Farmer party as organized by H. W. Wood, and proceeded to hitch it up with all the revolutionary, anarchistic and seditious forces in the country. He declared that William Irvine, of Calgary, was in favour of soviet government, and that the farmers had had Ivens of Winnipeg fame, a sedition at, in his riding during the last provincial election, the man 'by whose orders only little children were allowed to get milk in the Winnipeg strike.' He ended up with a frank declaration that the fight against this was more important an issue than the issue between the Liberal party and the present government at Ottawa."

JAS. DOUGLAS NOMINATED FOR STRATHCONA

Wetaskiwin, Oct.—The supporters of the Meighen administration in the Strathcona constituency met in convention here today and selected Jas. Douglas, the sitting member, as their standard bearer for the forthcoming contest.

The only other name in nomination was that of A. R. Aldridge, who withdrew before a ballot was taken. The National Liberal-Conservative association of the Strathcona constituency was also organized, when Geo. E. Bowker was elected secy.-treas.

DR. CLARK WILL NOT BE A CANDIDATE

Dr. Michael Clark will not be a candidate in the coming federal election, so he states in the following telegram to the Calgary Herald: "In answer to numerous inquiries from Red Deer and other constituencies, be good enough to save my friends and myself trouble by stating definitely that I will not be a candidate in this election."

MASSEY-HARRIS TO OPEN PLANT IN AUSTRALIA

Toronto, Oct. 5.—The Massey-Harris Implement Company announced yesterday that a plant will be opened by them in Australia for the manufacture of tractors for the Australian trade. The company produced $6,000,000 worth of machinery for Australia last year. The new Australian tariff has closed the commonwealth to outsiders and it becomes necessary to set up a plant there in order to hold this trade.

Seed Grain Relief Advances--- Millions Outstanding

Over four and a half million dollars is now owing to the province of Alberta for seed grain and relief advances during the past four years. The returns have been coming in slowly, but it is expected that in some districts there will be little liklihood of repayment being made this year. In the municipalities there is a total debt to the province of $3,314,862.00, and while this debt was taken on by the municipalities themselves, the province paid off the debt to the banks at the beginning of this year, so the debt is now between the municipalities and the province. In the unorganized districts the total outstanding amount for seed grain is now $1,258,749, while total collections to date have been $301,902. So far this year there have been no collections in the unorganized districts.

NEW BRUNSWICK GOES BONE DRY

St. John, New Brunswick, Oct. 11.—The people of New Brunswick in no uncertain manner, yesterday cast their ballot in favor of a bone-dry province. Thus, the last remaining province of the dominion to permit the importation of liquor for beverage purposes, has registered its verdict in favour of complete prohibition, and after the formal promulgation of an order-in-council enforcing the people's will, the province will automatically become bone dry. The vote against the importation of liquor was at midnight reported to be about two to one.

Traders arriving from the far north are of the opinion that we are going to enjoy an open fall, for the reason that the northern water fowl are not yet exhibiting any signs of migrating en masse. Several flights of wild geese have passed south, but the great majority of the flocks still appear to be in temporary residence, and passing through Lake Athabasca last week the north men saw countless thousands of geese and ducks feeding on the big lake. The Indians, who are generally credited with a fair idea of forecasting the weather from the habits of the various animals, are also of the opinion that the fall will be open, and the winter a light one.—Edmonton Bulletin.

Public Notice

A MEETING will be held in the ASKER U.F.A. HALL on the 17TH of OCTOBER, for the purpose of organizing a Milk and Cream Producers Association.

McSmith, M.P.P., of Olds, President, will address the meeting as well as other prominent dairymen. Everyone interested in dairying is urgently requested to attend. Meeting to commence at 8 o'clock sharp. Remember the date and the place.

Always Pure and Clean and Kept Good in the Sealed Package

The Importance Of Encouraging Western Settlers

The many advantages that would accrue to Canada from the settlement of the vast unoccupied areas of fertile agricultural lands in the West are fairly well recognized by all people, yet the work of peopling these vacant lands languishes and proceeds almost at a snail's pace.

There is hardly a Canadian problem today, the solution of which, wholly or largely, is not to be found in a large increase in the population of the country.

Is it the large national debt created by the war and the consequent heavy burden of taxation? The solution is not so much in decreased expenditures or newer and additional means of revenue, but in a larger number of people to produce new wealth and to carry a share of the national load, there by reducing the burden all round.

Is it the problem of making the National Railway pay? The solution is not to be found in higher rates for passengers and freight, which would operate to further decrease traffic, nor solely in economies in management and operation, to which there is a limit if efficient service is not to be destroyed, but through increased population and increased production creating greater traffic to keep the railway profitably busy.

Is it a steady outrun for our factories and underemployed employment for Canada's artizans? The solution is more people in Canada requiring the output of our factories.

Older countries, already blessed with fairly large populations, can well depend upon the natural increase of their people. But not so a young country like Canada, an empire in itself covering half a continent and possessing untold wealth in untouched natural resources. Canada now requires, and for many years to come will require, just what the United States required throughout the Nineteenth Century, and that is a large and steady stream of immigration. The United States, only by more than one hundred million people, can now afford to check the stream, but Canada needs to encourage it.

In the ten or fifteen years before the war, immigration poured into Canada at a rate never experienced prior to that time. The mere handful of people in the West doubled, trebled, quadrupled; unpopulated territories became flourishing Provinces; hamlets grew into towns, towns were transformed into thriving cities. Why? Because the incoming settlers brought money and goods with them, settled on vacant lands and began to produce. As they produced new wealth from the soil, the demand for the factory products of the East grew by leaps and bounds. Factories which had remained at a standstill in volume of production year after year, or grew so slowly that it was almost imperceptible, suddenly found it necessary to build a new storey, an addition, or a new building altogether in order to meet the demand. Labor was at a premium and unemployment practically unknown. The railways were congested with more traffic than they could handle. More railways had to be built, and thus more employment was created. The mines were busy and so was the lumber industry. It was all directly traceable to the immigration and the enormous resultant increase in agricultural production.

With no recent an object lesson before the country it is amazing to find a very large number of people opposing immigration to Canada now when, in order to carry the burdens imposed on the Dominion by reason of the war, the need for more people and largely increased production is so evident. Restrictions have been placed on immigration to Canada which were undreamed of a few years ago, and are of such a character that if the standard at a recent public meeting said, had they been in force at the time [illegible] cents and grand-parents immigrated to this country, probably one-half of the people now here would not be here. Stringent as present restrictions are, there is persistent demand in some quarters that they be made even more stringent, while some advocate absolute prohibition of immigration.

Possibly the immigration laws of both Canada and the United States were too lax in the past in one respect in that the bars were not kept up against the admission of the diseased, the mentally and morally deficient, and the criminal class. All such should be rightly excluded. But lack of money should not be made a deterrent to anybody who is physically fit, mentally sound, and possessing efficient, capable and willing to work.

In another respect, too, Canada was at fault in the past in its treatment of new comers. It is not sufficient to induce people to come to assist in the development of the country and on their arrival to leave them to shift for themselves, which so often led to failure and shipwreck of their lives through ignorance of the conditions and customs of the land of their adoption. A recent little "Manual of Citizenship" issued by the Department of Immigration and Colonization for the guidance of new arrivals is, therefore, an encouraging innovation. In fact, the change in name from Department of Immigration to "Immigration and Colonization" is in itself significant as an indication of a new and better policy. It is important, however, that the work of Immigration should not be stopped nor checked by too rigid laws and regulations. On the contrary increased efforts should be put forth to secure new settlers of the right type.

German Competition Becoming Severe

Tenders For Railway Equipment 40 Per Cent. Below British.

Commenting on the severity of the German competition for orders for railway equipment, Modern Transport states that one German firm's tender was 40 per cent. under the next British tender for carriages for the Indian state railway. The tender for one of the Burman railways has been given to a British firm, although the quotations exceeded the lowest German quotes by 10 per cent.

Persistency of British Post.

An instance of British postal delay but an equal testimonial to its persistency, was the delivery at Prince Albert to J. Harris, an Imperial veteran, of a packet of cigarettes mailed him while he was engaged in the South African War, from England in 1902. The package indicates that during its 13 years rambling it has been to India, New Zealand, and nearly all over the globe.

MISSED his train—but not refreshment. Coca-Cola is sold everywhere.
THE COCA-COLA COMPANY
Toronto and Winnipeg

W. N. U. 1389.

Past And Present

Experience of One Generation Is Valuable to Another.

Our view of the present age should be neither gloomy nor smugly optimistic, but based upon constructive criticism. Our political and economic systems are no more perfect than our machinery for manufacture and transportation and should be regarded as always susceptible of improvement. As to the characteristics of our young people and their attitude toward life, what is required is not indiscriminate denunciation, but systematic, serious and constant study of conduct in all human relations. Conduct is not always a simple matter, but presents problems calling for something like scientific analysis. The experience of one generation is, of course, valuable to another, but the gift must be imparted with tact and discrimination and without irritating claims of superiority.—The Toronto Globe.

Canadian Copper Production

Report Shows Value in 1919 Was Over Thirteen Millions.

With a capital investment of $15,054,991, the brass and copper industry of Canada in 1919 had a production value of $13,760,311, according to a preliminary report of the Dominion Bureau of Statistics. The number of plants in operation was 29, of which 20 are in Ontario, 12 in Quebec, 2 in British Columbia, 3 in Manitoba and 2 in New Brunswick. The number of employees was 3,121, and the salaries and wages paid $3,612,603.

The Etiquette of the Road.

Even if it is a good deal of trouble, motorists usually can avoid some additional trouble by stopping as soon as possible after hitting a pedestrian. And, besides, ordinary manners demand that he stop; the pedestrian nearly always does.

First League Of Nations

Ratified In America In 1621 and Kept For 50 Years.

An incident of President Harding's recent participation in the Pilgrim tercentenary celebrations at Plymouth, Mass., was a meeting of the President and Mrs. Charlotte Mitchell, a direct descendant of Chief Massasoit, the Pilgrims' staunchest Indian friend.

Chief Massasoit, according to historical records, was one of the promulgators of the first "League of Nations Covenant," to which Americans were a party. This first peace covenant and League of Nations was ratified in America in 1621. The conference was held at Plymouth in March of that year. The resulting organization was strictly an American league between the aboriginal redskins and the Anglo-Saxon invaders. It was kept without amendment for fifty years.

The preliminary Council, the drafting and ratification were all concluded within a week. The covenant included reparation. Article VI. contains provision for the beginning of universal disarmament. The record reveals that the "savage" not only ratified, but took the initiative in dressing up the covenant and treaty.

Mighty Britain

Premier Says Nation Is Safest and Truest of all Lands.

The British prime minister spoke as a native son recently in a little village of Lloyd George. He thought was in neglige when he talked to the town councillors, and yet that very informality gave it a veritable sincerity which sometimes the more ordered remarks of statesmanship do not possess. David George, the man, was speaking simply. "If Britain goes down," he said, "I do not know what help there is for Europe. Britain is the healthiest, safest and truest of all lands. I do not see anything that can take its place at the present moment."

That is a characteristic expression of simple people all over the world. If David Lloyd George did not believe it he could not be prime minister. Bernard Shaw could not have said it and that is the reason he is not prime minister. Yet there has probably never been a nation, or race, or tribe which do not believe the same thing of itself. The British prime minister may lay claim to reality. Despite all the tragedy and blunder, Britain has made a contribution which the world will not soon forget.—New York Globe.

Novel Idea Of British Inventor

Barrel Which Cannot Leak Is Arranged in Sections.

When oil is carried across the sea in ordinary ships it is usually stored in tins and wooden cases. The leakage from these cases is very considerable, and sometimes as much as a fifth of the oil will have disappeared at the end of the voyage. The attention of inventors has therefore been called to the problem of designing a barrel which will not leak. Success has been achieved by a British inventor who has designed a most ingenious barrel from which leakage is impossible. In fact, the model cost the inventor over £7,000, but the barrel itself can be manufactured in quantities at from £3 to £4 each. The barrel is arranged in sections so that when empty it can be "nested" with a view to saving space. The adoption of this barrel is likely to become general in view of the high insurance rates charged for oil conveyed in the usual way.

Luxuries And Short Hours.

If the popular preference for luxuries were limited to fine and expensive shoes the matter would not be worth a second thought, but what is happening with respect to footwear is merely symptomatic of a general tendency. Too many people are trying to buy luxuries and work less at the same time. If production kept pace with our easy habits of spending, a reasonable balance would be preserved; but that is not occurring. Many are demanding more pay and shorter hours, which is hardly the right way to reach the end in view.—St. Catherine's Standard.

Mistake Somewhere.

A candidate had been orating in the country and after the affair was over a friend said: "Well, you had a good reception." "Yes," replied the candidate, "but there was something wrong about the floral part." "Why," said the friend, "you were presented with three bouquets." "I know that," said the candidate, "but I paid for four."—Toronto Telegram.

One of the most serviceable waterproofs is the raincoat of Mitsumata paper, made from the leaves and stems of a small shrub which grows in the mountains of Japan.

The gold production of the world up to the end of 1919 is estimated at about $16,116,500,000.

Spend your money at home, thereby helping your own town and local merchants.

Minard's Liniment Lumberman's Friend

Proves Irrigation Is a Success

Man in Third Season Owns Farm and Equipment.

Proof of success in the irrigated section in Alberta is exemplified in a farmer named Williamson. After working as a hired man he rented an engine and ploughing outfit on an acreage basis and with the proceeds of one seasons ploughing purchased an irrigated farm of eighty acres and broke it. In the fall he bought a threshing machine and paid for it through the proceeds of the season's threshing operations. This is his third season's farming and he owns a farm, threshing and ploughing outfit and tractor, all fully paid for.

THE ORIGIN OF GALL STONES

They are simply dried bile made up of Crystalline constituents of that fluid. Very common in this disease among merchants, clergymen, shop girls and those of sedentary habits. Prevention consists in maintaining correct action of the liver and bowels, and this is speedily accomplished by using Dr. Hamilton's Pills. No person using Dr. Hamilton's Pills will be subject to bilious fits. Sound digestion, good appetite, a clear color will evidence the health giving properties of Dr. Hamilton's Pills which are safe and best for general family use. When a laxative is needed, when you feel out of sorts, that's the time to use Dr. Hamilton's Pills of Mandrake and Butternut, 25c all dealers or The Catarrhozone Co., Montreal.

More Acres Seeded To Rye

Estimated That Crop of 1922 Will be Large.

It is estimated that Southern Alberta and Southern Saskatchewan are this year seeding about 850,000 acres to fall-planted rye, as compared with 350,000 acres last year, an increase of about 500,000 acres or about 185 per cent. It is further calculated that, given an average yield per acre, the rye crop of 1922 in Southern Alberta and Saskatchewan will give the farmers of these districts three or four million dollars more than they will receive this year.

MILD EPIDEMIC GOING ROUND

It is due to impurities in the water, causes cramps, diarrhoea, headache. Those who take twenty drops of Nerviline in sweet water usually get quick relief. It is really wonderful how good old Nerviline fixes up a sou[illegible] stomach, how it does [illegible] ache, how it [illegible] ache, how quickly it puts a stop to those nasty attacks of gas. Every home should have a bottle or two of trusty old Nerviline on hand. 35 cents everywhere.

Perseverance.

He—"Couldn't you learn to love me?"

She—"I might. I once learned to like cold liver oil."

Here Is What The Principal Learned

DODD'S KIDNEY PILLS ARE THE REMEDY FOR KIDNEY ILLS.

Principal of Saskatchewan Schools Tells Out of His Own Experience What to do When the Kidneys are Diseased.

Webb, Sask. — (Special). — That there is one sovereign remedy for kidney disease and that remedy is Dodd's Kidney Pills is the outspoken opinion of Mr. George Hutchings, principal of the public schools here.

"I suffered for two years from diseased kidneys," Principal Hutchings states. "I was advised about a year ago to try Dodd's Kidney Pills. They have helped me more than any remedy I have ever tried. I find that my health has been greatly improved.

"I can conscientiously recommend Dodd's Kidney Pills to anyone suffering from kidney disease. I would not be without them."

Dodd's Kidney Pills act directly on the kidneys. They help the kidneys to do their full work of straining all the impurities out of the blood. The result is new health and energy all over the body. Ask your neighbors about Dodd's Kidney Pills.

A Stickler for Politeness.

"I'm shocked at you kicking your little playmate," scolded Raymond's mother.

"I got tired of playing with him and I wanted him to go home," the youngster excused himself.

"Then why didn't you ask him to go home?"

"Why, mamma," he said in amazement, "that wouldn't have been polite."—Boston Transcript.

The halibut fishermen of the Pacific pay all their bills before starting on a fishing trip.

It pays to patronize home industry. Buy from the merchants in your own town.

Healthy Liver Healthy Life

Your liver—healthy or clogged, active or sluggish—makes all the difference between a vigorous, cheerful life and blue feelings, headaches and sallow skin.

CARTER'S LITTLE LIVER PILLS

A stubborn liver, over-come constipation, dizziness, bilious-ness, indigestion, headache and the blues there is nothing on earth so good as Carter's Little Liver Pills. Purely vegetable.

Small Pill—Small Dose—Small Price

Sixty Years In One Regiment

Captain Swift Joined Queen's Own Rifles In 1861.

Captain Charles Swift, leader of the bugle band of the Queen's Own Toronto Rifles of Canada, has the longest service of any military man in Canada—sixty years in the one regiment. The Militia Department has just marked this service by promoting him to an honorary Captaincy in the regiment. It was as a triangle player that Captain Swift joined the Queen's own regiment at Rideway in 1861, and led the band on the trip to the coronation of King Edward. Leading musicians from all parts of the world have congratulated Capt. Swift on the wonderful band he leads.

Curing Plant Diseases

British Government Secures Services of Expert Scientists.

The increase in the world's store of food has become, since the war, a most pressing problem. Men of science have realized for many years that the quantity of vegetable food actually produced could be multiplied if plants were protected from fungus and parasites of all kinds. A similar state of affairs exists in connection with plants which have a commercial value. The British Government has, therefore, decided to establish an Imperial Bureau which will make a close investigation of plant diseases and experiment with methods of preventing or curing them. The services of the highest experts have been secured for this bureau, and the work it is expected to accomplish will be of great benefit not only to the British Empire but to the world at large.

The Bolshevists Of America

Preaches State of Affairs That No One Can Imagine.

He who preaches Bolshevism to the American people preaches more tyranny, more injustice, more social paralysis, more want and suffering than ever were bound up in any social or political doctrine that the uneasy mind of man or woman ever conceived. This is the American people, who are now engaged in relieving the sufferings of the victims of the Marxian philosophy and practice in Russia, know quite too well the hideous reality of the thing that its discredited advocates may make.—The Boston Transcript.

Hail Insurance Claims.

Directors of the Municipal Hail Insurance Association have fixed the rate of premium to be paid by farmers for the current year at twenty-five cents an acre on the net seeded acreage. Based on all claims received this levy practically means a five per cent. rate. Claims number 31,689,191.

Wheat Yield in Saskatchewan.

The wheat yield of Saskatchewan is estimated for the present year to be 145,082,000 bushels; oats, 196,120,000 bushels; barley, 13,500,000; flax, 4,500,000 bushels; and rye, 1,053,000 bushels.

A Prime Dressing for Wounds.—In some factories and workshops carbolic acid is kept for use in counteracting wounds and cuts sustained by the workmen. For better to keep on hand a bottle of Dr. Thomas' Eclectric Oil. It is just as quick in action and does not sear the skin or burn the flesh.

Newsboy Going To University

Has Saved Enough to Put Himself Through.

For the past ten years, David Pasternack, working under the handicap of possessing but one limb, has sold newspapers on the streets of Calgary. David has gone to Kingston, Ont., to study at Queen's University with the idea of eventually becoming a chemical engineer. For the past four years David has saved carefully, and today possesses sufficient wherewithal to put him through the eastern university.

To Study Export.

The Trade and Commerce Department of the Dominion Government is opening an office in Vancouver, for the purpose of studying everything connected with the export trade in the Pacific coast. It is stated that the vessels of the Canadian Government Merchant Marine have had for some time full cargoes both inbound and outbound from Pacific ports.

Growing Fuel In Six Years

Many Trees Suited For Prairies Grow Very Rapidly.

Many of the species which can be used on the prairies are very rapid growers, for example, cottonwood, willow, Russian poplar and Manitoba maple. It is safe to say that wood large enough for fuel can be grown from any of these trees within six years. After that time a plantation will increase in value and productiveness year by year and will prove one of the best investments on the farm.

On the Nursery Station at Indian Head, Sask., a plot three-quarters of an acre in extent was planted out to Russian poplar in 1906, trees spaced four feet apart each way. In 1913 the average height of these trees was twenty-three feet. In the fall of 1913 half the plot was cut down and yielded six and three-quarter cords of quite fair fuel. This is at the rate of about eighteen cords per acre in eight years. The soil was a medium clay loam. The labor cost of planting was $5.80 per acre and cultivation for two years about $6 per year.—N. M. Ross, Supt. of Tree Planting, Dominion Forestry Branch, Indian Head.

GOOD HEALTH AND GOOD SPIRITS

Depend Upon the Condition of the Blood—Keep it Rich, Red and Pure.

When a doctor tells you that you are anaemic, he simply means, in plain English, that your blood is weak and watery. But this condition is one that may easily pass into a hopeless decline if prompt steps are not taken to enrich the blood. Poor blood, weak, watery blood is the cause of headaches and backaches, loss of appetite, poor digestion, rheumatism, neuralgia, nervous, irritability and many other troubles. To poor blood is due the pimples and blotches, the muddy complexion that disfigures so many faces. To have good health, a good complexion and a cheerful manner, the blood must be kept rich, red and pure. This is easily done through the use of a blood enriching tonic like Dr. Williams' Pink Pills. The whole mission of this medicine is to help enrich the blood which reaches every nerve and every organ in the body, bringing with it health, strength and new activity. That is why people who occasionally use Dr. Williams' Pink Pills always feel bright, active and strong.

Mrs. E. E. Cook, Simcoe, Ont., gives strong testimony to the value of Dr. Williams' Pink Pills when the blood is in an anaemic condition, she says: "I have been a sufferer for some years from a run down condition of the system. I suffered from pains in the back, weakness of the nerves and always cold, and though I was constantly doctoring, the medicine I took did not help me. I had practically given up hope of good health, until a friend from Hamilton came to visit me, and urged me to try Dr. Williams' Pink Pills. It took some persuasion, but finally I consented to try them, and I am glad to be grateful that I did, for after using seven boxes I felt like a new person. I have gained in weight, have a better color and my work is now a pleasure. For this condition my thanks are due Dr. Williams' Pink Pills, and I cannot praise them too highly."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Discover Greek Temple

Inscriptions of Bronze Establish Date of 400 B.C.

Greek archaeologists have unearthed an imposing temple at Rerras, Thessaly. The structure is in an excellent state of preservation and is stated to be as large as the temple of Jupiter at Olympia. The temple dates from the fourth century B.C. that of 400 B.C. Tablets have also been found bearing indications of laws and resolutions of ancient civilization. This is the second temple which has been discovered within a month, the first having been found near the city of Volo. The excavations are continuing.

Why No Rainbow in Winter.

Why is the rainbow so frequently seen during summer and so seldom during winter? Its formation, we are told by Professor W. J. Humphreys, the eminent meteorological physicist, requires the co-existence of rain and sunshine, a condition that often occurs during local convectional showers but rarely during a general cyclonic storm, and as the latter is characteristic of summer and the latter of winter, it follows that the occurrence of the rainbow correspondingly varies with the seasons.

"There was a strange man at the door, sir," announced the new servant from Boston. "What does he want?" asked the master of the house, impatiently. "Begging your pardon, sir," replied the new servant, a shade of disapproval manifest in his voice, "he wants a bath, but what he is asking for is something to eat."

His French.

"Where did you learn your French, Mr. Sapleigh—abroad?"

"No, right here, off perfume bottles!"

Indians of Nootka Sound possess wooly dogs, the fleece of which is readily woven into garments.

Immigrants Were Mostly British Born

Fifty Thousand Arrive in Canada in Four Months.

For the four months, April to July, inclusive, the total British immigration into Canada was 78,268, from the United States for the same period, 14,219, and from all other countries, 9,439. Of the United States settlers, the department asserts, the great majority are English-speaking and in large proportion are descendants of British born. Rejection at ocean ports during the four months, April to July, numbered 344, of which only 72 were British.

Banks And The People

Money Is No Longer Hidden, But Put to Work.

The war, with its severe drain upon the resources of the people and its popular loans in which the banks became the direct agents of the Government in dealing with the people, did much to create interest in the banks and to arouse a response to their appeals to the thrift and prudent commonsense of the people. The hidden money bag of pioneer days has almost disappeared. The people are putting their money to work. They are coming to the view that their surplus money is merely stored work, with a satisfactory potential earning power, and the more of this there is in the country the better, for idle money is as much an evil as the hands.—The Indianapolis News.

Glass Bottomed Boats

Enable Passengers to Watch "Life Under the Sea."

So beautiful is the "scenery" under the sea around the island of Santa Catalina, California, that small steamers, with glass bottoms, are run to enable the passengers to study and enjoy the beauties of the deep.

Part of the bottom of these boats is made of glass and railed off, inviting-sitting accommodation all round. The water is wonderfully clear, and the passengers see vast forests of seaweed in the ocean beneath, with red and white fish swimming about.

In Avelond Bay, these glass-bottomed boats cruise round the Sugar Loaf Rock, where divers go down for lobster shells. So clear is the water that their movements are watched with breathless interest by the passengers through the glass.

A cruise of this sort is a wonderful lesson in "life under the sea," where one can watch in perfect comfort and dryness all the wonderful beauties and mysteries of the deep.

Woman Painter Dead.

Toronto.—Mrs. Mary H. Reid, 67, one of Canada's best known women painters, died suddenly here.

SUFFERING OF YOUNG WOMEN

This Letter Tells How It May be Overcome—All Mothers Interested.

Toronto, Ont.—"I have suffered since I was a school girl with pain in my left side and backache, indigestion, dizziness, growing worse each year until I was all run down. I was so bad at times that I was unfit for work. I tried several doctors and patent medicines, but was only relieved for a short time. Some of the doctors wanted to operate, an operation, my father objected. Finally I was advised through my mother of Lydia E. Pinkham's Vegetable Compound, and how thankful I am that I tried it. I am relieved from pain and cramps, and feel as if it has saved my life. You may use my letter to help other women as I am glad to recommend the medicine."—Mrs. H. A. Goodman, 14 Rockvale Ave., Toronto.

Those who are troubled as Mrs. Goodman was should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound.

Those who need special advice may write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. These letters will be opened, read and answered by a woman and held in strict confidence.

OTTINGS OF TOWN ANT DISTRICT

Local News.

Mrs Geo. Beal returned last week from a lengthy stay in the States.

Mrs Dick, of High River, is visiting with her sister, Mrs M. G. Neff.

Mrs H. E. Pendleton left Tuesday on a visit to her mother in town.

G. E. Bowker left on Wednesday for Banff, in order to take treatment.

Miss Nellie DeWilde, of Edmonton, was home over the week-end.

Miss Eva Morrow, of Chauvin, is spending a short vacation with her parents.

Mrs Dr. Graham and daughter, Dorothy, returned from their visit to the coast last week.

Mr and Mrs J. A. Kerr were Edmonton visitors the first of the week.

Mrs Hugh Miller arrived home on Friday from Carleton Place, Ontario, where she had been visiting with her mother for a couple of months.

Orlando Bush, of South Edmonton, has been appointed returning officer for the Strathcona constituency

Mr and Mrs Jas. Bell, of Nevada, who have been visiting with relatives here, left for their home on Monday. They had a most enjoyable holiday.

Many will regret to learn of the death of James McCaig, chief publicity commissioner for Alberta, and formerly superintendent of Edmonton public schools, which took place at his residence in Edmonton on Saturday. Mr McCaig was well known in educational circles in this district.

No break in threshing operations during the week, the weather being ideal. Another week and the threshing outfits will be laid aside for the season.

Large flocks of geese can be seen wending their way southwards, but the ducks are still with us, in fact the northern birds have not made their appearence, the weather being so mild.

The Herald has a fine selection of private Christmas cards on hand, and it would be well if parties desiring to make selections would call as early as possible as there is sure to be a rush later on and the printing may be held up.

Mrs and Mrs John Jenkins paid Bunker Hill a visit last week, and notwithstanding that they are now town residents found everything to their liking, the dogs even gave them a welcome.

The school fair, held on the Ponoka ball grounds on Saturday was very successful in every respect. A large number of exhibits, which were most creditable. Of course the sports were keenly contested, and altogether the children had a good outing. Some ten schools took part. The list of prize-winners will be given in next week's issue.

ERICKSON.—On Sunday, October 9th, to Mr and Mrs J. G. Erickson, a son.

Owing to unsatisfactory prices ruling, and threshing operations claiming the farmers' attention, the Lacombe sheep breeders have called off their sale of sheep, which had been announced for October the 12th. The sale will be held on a later date.

The chicken shooting season opens on Saturday, the 15th, and closes on October 31st. Birds are very numerous, and the season all too short. The law allows ten birds per day, and fifty for the season, and surely no sportsman will exceed that number. The birds are not supposed to be exterminated during the fourteen open days.

A communication has been received from Benj. Lawton, chief fire guardian, in which he asks that attention be drawn to the fire hazards as existing at present—"In many sections the stubble in the grain fields is already inflammable, and grain has been destroyed also buildings. It is important that every possible precaution should be taken to prevent the spread of fires kindled in the open, in fact no fire should be kindled in the open at the present time unless where it is absolutely necessary, and no match, cigar, or cigarette stub should be thrown away until completely extinguished." There has been a number of fires in this district of late, and it would be well to pay attention to Mr Lawton's warning.

We have been asked to inform our readers that the Alberta Amateur Hockey Association will hold their annual meeting in Calgary on November 5th, and that every hockey club in the province should hold its organization meeting and appoint a delegate to this meeting. Groups will be formed to cover every district that wishes to enter and compete for provincial honors during the season of 1921-22, and will cover senior, intermediate and junior series. The co-operation of every club is earnestly desired.

CHURCH NEWS

UNION

October 16th.—11 a.m., "Opportunity." 7.30 p.m., "Mothers' and Daughters' Service." A special invitation is extended to all girls and their mothers to be present Bright singing; cordial welcome to all.

Oh, Money! Money!

BY

ELEANOR H. PORTER

Printed by Special Arrangements with Thos. Allen, Toronto, Ont.

(Continued)

"I couldn't—all the time. I—I smashed a bowl once, and two cups." She laughed shamefacedly, and met his eyes now. "But I soon found that it didn't make me or anybody else—any happier, and that it didn't help things at all. So I tried—to do the other way." And now, please say you'll forget all this—what I've been saying. Indeed, Mr. Smith, I am very much ashamed."

"Forget it?" Mr. Smith turned on his heel and marched up and down the room again. "Confound that man!"

"What man?"

"Mr. Stanley G. Fulton, if you must know, for not giving you any of that money."

"Money, money, money!" Miss Maggie threw out both her hands with a gesture of repulsion. "If I've heard that word once, I've heard it a hundred times in the last week. Sometimes I wish I might never hear it again."

"You don't want to be deaf, do you? Well, you'd have to be, to escape hearing that word."

"I suppose so. But—" again she threw out her hands.

"You don't like money," Mr. Smith was regarding her with curious interest. "Don't you want—money, really?"

She looked at him, then she sighed.

"Oh, yes, of course. We all want money. We have to have money, don't we? I don't like it—everything in the world, by any means."

"You don't think it brings happiness, then?"

"Sometimes. Sometimes not."

"Most of—er—us would be willing to take the risk."

"Most of us would."

"Now, in the case of the Blaisdells here—don't you think the money is going to bring happiness to them?"

There was no answer. Miss Maggie seemed to be counting.

"Miss Maggie," exclaimed Mr. Smith, with a concern all out of proportion to his supposed interest in the matter, "you don't mean to say you don't think that money is going to bring them happiness?"

Miss Maggie laughed a little.

"Oh, no. The money'll bring them happiness all right, of course—particularly to some of them. But I was just wondering if you don't know how to spend five dollars so as to get the most out of it, how will you spend five hundred, or five hundred thousand—and get the most out of that?"

"What do you mean?"

But Miss Maggie did not look her head.

"Nothing. I was just thinking," she said.

CHAPTER XI.

Santa Claus Arrives.

It was not long after that that Mr. Smith found a tall, gray-haired man, with bent spectacles, in the office of Mrs. Jane Blaisdell and Mellicent in the front room over the grocery store.

"Well—" Jane Blaisdell, with a faint light of recognition in his eyes. Then suddenly he stooped and picked up something from the floor. When he came upright his face was very red. He did not look at the tall, gray-haired man quite as he addressed his first remark.

Mellicent turned to him eagerly.

"Oh, Mr. Smith, it's the lawyer—he's come. And it's true. It is true!"

"This is Mr. Smith, Mr. Norton," murmured Mrs. Jane Blaisdell to the gray-haired man, who, also, for no apparent reason, had grown very red. "Mr. Smith's a Blaisdell, too—distant, you know. He's doing a Blaisdell book."

"Indeed! How interesting! How are you, Mr. Smith?" And the lawyer smiled and held out his hand, but there was an odd constraint in his manner. "So you're a Blaisdell, too, are you?"

"Er—yes," said Mr. Smith, smiling straight into the lawyer's eyes.

I'm So Tired

Fatigue is the result of poisons in the blood. So when the kidneys fail to purify the blood one of the first indications is unusual and persistent tired feelings and pains in the back.

Neglected kidney troubles lead to years of suffering from rheumatism or develop into such fatal ailments as Bright's disease.

The kidney action is promptly corrected by use of Dr. Chase's Kidney-Liver Pills — the best known regulator of kidneys, liver and bowels.

Mrs. John Ireland, R.R. No. 2, King, Ont., writes:

"I was a great sufferer from severe headaches and bilious spells. I tried a number of remedies without obtaining any benefit until I was advised to use Dr. Chase's Kidney-Liver Pills. These completely relieved me and made me feel like a new person. I am very grateful to Dr. Chase's medicines for what they have done for me, and you may use my letter for the benefit of others."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers or Edmanson, Bates & Co., Ltd., Toronto.

W. N. U. 1289.

DEEP HOLLOW COUGHS ARE MIGHTY DANGEROUS

That same cough is everywhere you go, deep and hollow, why—because consumptive. First it was a cold, next came Catarrh, vitality decreased then the trouble was very serious. Never neglect a cold, not even a little one. Never trifle with sore throat or Catarrh. Get out your "Catarrhozone Inhaler," breathe deeply into your lungs the healing soothing vapor of Catarrhozone. Let Catarrhozone clear out the nostrils. You'll wonder at the change when you use this healing remedy. It really splendid for coughs, colds, bronchial irritation and Catarrhal trouble. Sold everywhere. Two months treatment $1.00, small size 50c.

"But not near enough to come in on the money of course," explained Mrs. Jane. "He isn't a Hillerton Blaisdell. He's just boarding here, while he writes his book."

"Oh, I see. So he isn't near enough to come in—on the money." This time it was the lawyer who was smiling straight into Mr. Smith's eyes.

But he did not smile for long. A sudden question from Mellicent seemed to fix her father on his lips.

"Mr. Norton, please, what was Mr. Stanley G. Fulton like?" she faltered.

"Mr. Norton—please, you must have seen his pictures in the papers," stammered the lawyer.

"Yes, but what was he like? Do tell us," urged Mr. Smith with a bland smile, as he seated himself.

"Well—" The lawyer came to a still more unhappy pause.

"Of course, we've seen his pictures," broke in Mellicent, "but those don't tell us anything. And you know him. You won't you tell us what he was like, please, while we're waiting for father to come up? Was he nice and jolly, or was he stiff and haughty? What was he like?"

"Yes, what was he like?" echoed Mr. Smith, and for some reason, seemed to be highly amused.

The lawyer lifted his head suddenly. An odd flash came to his eyes.

"Like? Oh, just like an ordinary man, I should say—with two eyes and nose of course." (A queer little half-gasp came from Mr. Smith, but the lawyer was not looking at Mr. Smith.) "Gentle—you've heard that, probably. And he has done crazy things, and no mistake. He's done with his money and position, we won't exactly say his head but his belfry—isn't that what they call it?—half."

Mr. Smith gave a real gasp this time, and Mrs. Jane Blaisdell ejaculated:

"There, I told you so! I knew something was wrong. And now he'll have to have a guardian, and I'll lose my board and claim like as not. Oh, dear, dear, dear! If we've gone and spent any of it—"

A gesture of despair from her sister-in-law.

"Give yourself no uneasiness on that score, madam," the lawyer assured her coldly. "I think I can safely guarantee he will not do that."

"Then you think he's—dead?"

"I did not say that, madam. I said I was sorry sure he was not comin back and claim this money that is to be paid over to your husband and his brother and sister. And of course there is no further power over that money save—"

"Oh!" breathed Mellicent. "Then it is—true?"

"It is sure," bowed the lawyer.

"But Mr. Smith says we've probably got to pay a tax on it," thrust in Mrs. Jane, in a worried way. "And I'm sure I don't much well have to pay. And isn't there any way we can save losing that?"

But here Mr. Norton could answer, a heavy step down the hall heralded Mr. Frank Blaisdell's advance, and in the moment's confusion of his arrival Mr. Smith slipped away. As he passed the lawyer, however, Mellicent thought she heard the words: "Not to cause!" But afterwards she concluded she must have been mistaken, for no one appeared to be paying heed at once the best of friends. Mr. Norton remained in town several days, and frequently she saw him and Mr. Smith chatting pleasantly together, or sometimes off apparently by himself. Mellicent was very sure, therefore, that she must have been mistaken in thinking she had heard Mr. Smith offer any remarkable explanation as he left the room that first day.

During the stay of Mr. Norton in Hillerton, and for some days afterward, the Blaisdells were too absorbed in the more details of acquiring and temporarily investing their wealth to pay attention to anything else. Under the guidance of Mr. Norton, Mr. Robert Chalmers, and the heads of two other Hillerton banks, the three brothers set themselves to the task of "finding a place to put it," as Miss Flora breathlessly termed it.

Mrs. Hattie said that, for her part, she should like to leave their share all in the bank; then she'd have it to spend whenever she wanted it. She yielded to the shocked protestations of the others, however, and finally consented that her husband should invest a large part of it in the bonds he so wanted, buying a generous sum in the bank to her own name. She was assured that the bonds were just as good as money, anyway, as they were the kind that were readily convertible into cash.

Mrs. Jane, when she understood the matter, was for investing every cent of theirs where it would draw the largest interest possible. Mrs. Jane had never before known very much about interest, and she was fascinated with its delightful possibilities. She spent whole days joyfully figuring percentages, and was awakened from each happy absorption only by the unpleasant realization that her husband was not in sympathy with her ideas at all. He said that the money was his, not hers, and that, for once in his life, he was going to have his way. "His way" in this case proved to be the prompt buying-out of the competing grocery on the other corner, and the establishing of a good-sized bank account. The rest of the money he said Jane might invest for a hundred per cent., if she wanted to.

Jane was pleased to this extent, and asked if it were possible that she could get such a splendid rate as one hundred per cent. She had not figured on that! She was not so pleased later, when Mr. Norton and the bankers told her what she could get—with safety; and she was very angry because they finally appealed to her husband and she was obliged to content herself with a paltry five or six per cent., when there were such lovely mining stock and oil wells everywhere that would pay so much more.

She told Flora that she ought to thank her stars that she had the money herself in her own name, to do just as she pleased with, without any old-fogy men, bossing her.

But Flora only shivered and said, "Mercy me!" and that, for her part, she wished she didn't have to say what to do with it. She was scared of her life of it, anyway, and she was just sure she should lose it, whatever she did with it; and she 'most wished she didn't have it, only it would be nice, of course, to buy things with it; and she supposed she would buy things with it, after a while, when she got used to it, and was not afraid to spend it.

Miss Flora was, indeed, quite breathless most of the time, those days. She tried very hard to give the kind gentlemen who were helping her no trouble, and she showed herself eager always to take their advice. But she wished they would not ask her opinion, she was always afraid to give it, and she didn't have one, anyway; only she did worry, of course, and she had to ask them sometimes if they were real sure the places they had put her money were perfectly safe, and just couldn't blow up, or break, or something always to see them smile, and hear them say: "Perfectly, my dear Miss Flora, perfectly!" Then yourself no uneasiness." To be sure, one day, the big fat man, not Mr. Chalmers, did point out: "No, madam, not by the United States; and, anyway, she did not think it was nice of him, and it was almost swearing to say "United States" in that tone of voice. She never liked that fat man again. After that she always talked to Mr. Chalmers, or to the other man with a "part on his nose."

Miss Flora had never had a checkbook before, but she tried very hard to learn how use it, and to show them she was grateful she was glad there were such a lot of checks in the book, but she didn't believe she'd ever spend them all—such lots of money! She had had a savings-bank book, to be sure, but she had not been able to add another to the bank for a long time, and she had been nearly always glad lately for fear she would have to draw some out, business had been so dull. But she would not have to do that now, of course, with all this money that had come to her.

(To be continued)

Experimental Forests

Proves That Tree Growth in Canada Is Rapid.

Everybody realizes the great benefit which the Dominion Experimental farms have proved to agriculture in Canada. In the same way it is believed that the establishment of forests will prove equally beneficial to forestry. The forestry branch of the Department of the Interior is carrying on the work in these experimental forests, the principal station at present being at Petawawa, Ontario. Here are found cut-over lands similar to thousands of acres in Ontario, Quebec and other forest provinces, and the work going on is to determine how best and most cheaply to get these lands back under a forest cover that will produce good timber and pulpwood. This is the fourth season since the work was established and already the knowledge of how rapidly Canadian trees grow under different conditions of thinning, light, drainage, etc., has been greatly increased. Similar information has been realized in Europe for about a hundred years, but European figures will not do for Canada. It is too early yet to state results definitely, but, generally speaking, what has been so far learned leads to the belief that trees grow in Canada as rapid in the parts of Canada under observation as in the timber-growing regions of Europe.—Canadian Forestry Journal.

Longest Shakespeare Play.

"Hamlet" is the longest of Shakespeare's plays, with 3,930 lines, and the "Comedy of Errors" the shortest with 1,777 lines.

Half Women Workers Teachers.

School teachers represent 50 per cent. of all the women engaged in gainful occupations in the United States.

Be fair to your local merchants. Ask to see his goods and compare prices before sending your money to the mail order houses. You will find that it pays.

CHECK YOUR

BOWEL TROUBLES

BY USING

DR. FOWLER'S

EXTRACT OF

WILD STRAWBERRY

When you are troubled with diarrhoea, dysentery, colic, cramps and pains in the stomach, cholera, cholera morbus, summer complaint, bloody fluxes, or any looseness of the bowels be sure and obtain a bottle of "Dr. Fowler's" and see how quickly it will give you relief. This wonderful remedy has been on the market for the past 70 years and we wish to warn you against accepting a substitute which may be dangerous to your health.

Mr. Samuel Buckler, Tatamagouche, N.S., writes:—"While visiting in Western Canada I had a severe attack of diarrhoea. After trying many proprietary medicines I got no relief but kept getting worse.

I was advised to take Dr. Fowler's Extract of Wild Strawberry, and I lost no time in doing so. I cannot hesitate in recommending it most highly, for when I had not yet taken half the bottle I was relieved. I must say that if "Dr. Fowler's" is given a fair trial it will show its good qualities."

The price of the genuine is 50c a bottle; put up only by The T. Milburn Co., Limited, Toronto, Ont.

BEAUTY OF THE SKIN

Is the natural desire of every woman, and is obtainable by the use of Dr. Chase's Ointment. Pimples, blackheads, ringworm and rashes of the skin, irritation and eczema disappear, and the skin is left soft, smooth and velvety. All dealers, or Edmanson, Bates & Co., Limited, Toronto. Sample free if you mention this paper.

Dr. Chase's Ointment

Ship Collided With Iceberg

And Polar Bear Was More Frightened Than Sailors.

The other day there came for repairs to one of the yards of the Todd Shipbuilding Corporation in this harbor an ocean steamship which had been damaged by collision with an iceberg. A hundred tons of ice crashed down upon the deck and stove in the bow of the vessel, but fortunately not below the water line. The collision occurred in a thick fog in consequence of which the speed of the ship had been greatly reduced, but the iceberg could not be perceived by the officers on the bridge until a moment before they struck it. Luckily for him, the lookout in the bow had just been called back to the bridge; otherwise he certainly would have been killed by the falling masses of ice.

This, however, is not the whole story of the collision. In the midst of the confusion which followed one of the ship's firemen, who had come on deck to cool off, observed excitedly making his way on a full run toward the stern of the vessel; and those on the bridge perceived to their utter astonishment that he was being pursued by a polar bear!

At all events, the stoker believed that the bear was after him and acted accordingly. The animal had evidently been involuntarily hurled to sea on the iceberg and had been thrown onto the deck by the force of the collision. He was as much frightened as the fireman was. He speedily realized that the deck of a ship was a less desirable berth even than an iceberg, and quick as a wink he was over the side, swimming back toward his icy shelter. The polar bear was off the ship and the stoker breathed safely.

If a modern novelist, placing one of his scenes on the deck of a trans-Atlantic steamer where the hero and his sweetheart were walking arm in arm, should cause their converse to be interrupted by a collision as we have described, followed by the appearance of a polar bear in the midst of things, he would be denounced by the critics as having indulged the intelligence of his readers. We should be told that he supposed the impossible; yet, as our story shows, he would be quite within bounds.

For the beauty of our story is that it is true.

Alberta Fur Farms

Province Was First to Have Karakuls Sheep Farm.

At the end of 1920 there were in Alberta fifteen fur farms, with land and buildings valued at $59,000, and the animals worth $139,670, according to a statement which has been issued by the Dominion Bureau of Statistics.

There are five hundred and eighty-two fur farms in Canada of which Prince Edward Island has three hundred and six. At the time the report was issued Alberta had the only Karakuls sheep farms in the Dominion, with one thousand one hundred head valued at $80,000 and the lamb crop for the year numbered four hundred.

Fox farms in Alberta show the following animals on hand when the report was issued: 183 silver, $48,500; 93 patch, $9,250; 25 red, $800. The statement only shows two patch forpelts sold during the year for $300.

Gives Vitamines a Dig

Sir James Crichton-Brown Says It's Foolish to Worry About Them.

The "bully beef" that the English Tommies used to say was a worse enemy than Fritz had a dreadful revenge when Sir James Crichton-Brown, a Harley Street dietitian, declared that it had just as many vitamines as any other kind of food.

Sir James then proceeded to give the much-sought vitamine an awful dig. "People got on pretty well," he said, "before they ever heard of vitamines, guided solely by their common sense and appetite. There are enough vitamines in one lettuce leaf to do for a fortnight. Don't worry your head about them. Go on and eat what you want."

Arizona and Missouri are the latest States to pass workmen's compensation laws.

The first mention of fountain pens is found in a book published in 1636.

Uses Of The Sunflower

Acre Will Yield Many Cords of Good Fuel.

The sunflower, although it originated in this country, in the great plains, is not used here so extensively as in some other countries, especially Russia in normal times. It is a long time since the plant was delighted the eyes of Europeans, being then cultivated in the gardens of Madrid. The early Spanish explorers had found it in this country and taken it home with them.

The plant was utilized by the American Indians long before the days of Columbus. When Columbus visited the Georgian Bay in 1615 he found the natives growing it and using the oil for their hair. It was also used for food, however, for the food afforded by the seeds.

In Russia the seeds have always been eaten in immense quantities, raw or roasted, as peanuts are in this country, and the oil obtained by pressing the seeds is an important article of diet. The frequent religious fast days in that country restrict the use of meat, and lead to the consumption of vegetable oil and it is normal time the manufacture of sunflower oil is always of considerable dimensions. The best seeds yield an oil which compares favorably with olive oil.

The seeds of the largest and finer flowers are held to be quite equal to most nuts in respect to palatability and wholesomeness. The stalks and dried leaves are highly prized as fuel, being in some parts of Russia the only available substitute for wood. An acre of sunflowers will yield many cords of good fuel.

The oil appears to possess more of the general properties of olive oil than any other known vegetable oil. It takes about a bushel of seeds to make a gallon of oil, and 50 bushels of seed can be grown on one acre of land. As the oil sells for more than $1 a gallon the profit is large.

Of late years purified sunflower oil has been used extensively in the adulteration of olive oil. It is of a pale yellowish color, and decidedly palatable. In a crude state it is used by painters to some extent, but it is inferior to linseed oil for use in paint.

Snakes Worth Money To Alfalfa Farms

Bullsnakes Clear Fields of Gophers And Are Harmless.

A fall grown bullsnake in a Kansas alfalfa field is worth at least $2.50 a year to the farmer on whose land he lives. This is the statistical deduction of experts at the Kansas State Agricultural College at Manhattan. They arrive at it in this way:

Figure are on the average six gophers to the acre, and they damage the alfalfa crop to the extent of about $2.50 a month. A bullsnake of this kind can keep an acre free.

The calculations are those of P. L. Hisaw, mammalogist, at the college, and J. B. Rogers, If its zoology department.

"A full grown bullsnake," says Mr. Hisaw, "is capable of eating all the gophers on an acre of alfalfa in one month, and during the six warm months of the year is able to clear six acres.

"Alfalfa growers should take serious thought of the economic importance of these harmless snakes. By protecting them a great deal of time and money can be saved in trapping and poisoning gophers and other rodents.

"The bullsnake feeds on rats and mice when around the barn or granary. The only return he asks for is the right to live an undisturbed life."

A Siamese Boy's Letter.

A Siamese boy at a private school in England became enamoured of a fair sister of one of his school fellows, resolved to write her and declare his passion. His knowledge of English being somewhat limited, many hours were spent in composing a suitable letter, but he finally established a masterpiece, which concluded with the following pathetic words: "I hope you does not go by the look-ing, like some people does, I whom is like a beast, but thou art like an angle."

Forest Surveys By Airplane.

One of the officers of the Dominion forestry branch reported after his first airplane survey trip: "This was my first opportunity to inspect from the air any extent of green timber, and I was amazed at the detail which it was possible to cover in time allowed by a single flight over the territory. There was no difficulty whatever in distinguishing clearly every species of trees on the ground."

A Pessimist Defined.

Asked for a definition of a pessimist, Dr. Furse, Bishop of St. Albans, promptly replied: "A man who wears a belt as well as braces."

The mallard duck breeds as far north as Greenland.

Says Her Recovery Is Almost Like A Miracle

From Helpless Invalid to Complete Restoration of Health, Strength, and Happiness Is Wonderful Change Mrs. Root Experienced in Three Weeks — Statement One of Most Remarkable On Record.

MRS. JENNIE ROOT

"Just a week before I started taking Tanlac I was down in bed so crippled up with rheumatism I could not move without help. My son had taken Tanlac, and it had done him a world of good, so one day he brought home a bottle and said, "Mother I want you to take this." When I had finished that bottle, I felt like a different woman, and by the time I had finished my second bottle, I was out in the garden hoeing.

"Tanlac has simply done wonders for me; it almost seems like a miracle." This is the remarkable statement made recently by Mrs. Jennie Root, residing at 1109 Power St., Portland, Oregon, and is only one of tens of thousands from well-known men and women who are daily testifying to the merits of Tanlac.

Continuing her wonderful statement, Mrs. Root said, "For years I suffered terribly with rheumatism and would often be down in bed for days at a time. In the last five years there was not a time that I didn't feel those rheumatic pains all through my body. About two months ago I got very much worse and my arms and legs were so bad I was almost helpless and couldn't even hold a pen to sign my name. I was so weak I could not do any housework. I couldn't even sleep, and had no rest day or night. Every time I would rise from my bed I would get up very cold and would have to get up and sit by the fire all huddled up, and my daughters would put hot water bottles all around me. I was treated by four doctors, and took all kinds of medicine. Nothing ever did me any good. I am just like a different person now. All those terrible aches and pains have left me, and only the other day I was able to walk up four flights of stairs in an office building when the elevator was out of order.

"My appetite is just splendid now, and just to-day for the first time in years, I felt so hungry that I had to go and eat a piece of pie between meals. In fact, I can't remember the time that I have felt as well as I do now. I have not only regained my health and strength, but I have gained fourteen pounds in weight. To tell you the truth, I wouldn't ever change the benefit I have received from Tanlac for the best ranch in Oregon, and I will praise it as long as I live."

Tanlac is sold by leading druggists everywhere. Adv.

B. C. Apples For London Exhibition

Three Creston Valley Ranches Will Be Represented.

Fifty boxes of Creston Valley apples with which it is hoped to make the Creston orchards products famous on the British market have been sent to the British Apple Show.

Three ranches are represented in this exhibition effort. The Little-John Ranch at Erickson will have four entries in the six-box lot class open to overseas growers. Mr. Littlejohn is pinning his faith on Snows, Cox Orange, Gravensteins and Kings. The W. V. Jackson Ranch will exhibit Wealthys in the same competition, while Iobert Stark has Cox Orange entered in the twenty-box lot open to the Empire competition, and another six boxes of the same variety in the overseas class.

Islands Appear, Then Vanish.

In region where volcanic action is severest, islands appear and die appear most unexpectedly. Not long ago one came to light off the Arakan coast of Burma. It was officially inspected and surveyed, but by the time the report had been prepared the island had disappeared again.

Rival Of Beaver And Handsaw

Electrically Heated Wire Used To Cut Logs In France.

For three years, different beavers, the original tree-cutters, have tried to cut down a big, black ash, 91 inches in circumference, on Whitefish River. The animals prefer this type of tree as they store the branches and eat the bark. In western woods lumberjacks wield huge saws and cut a tree in quicker time. But now, in the forests of France, a platinum wire made white hot by an electric current is used and the tree is felled much quicker than by beaver or handsaw.

Ten Million Russians Are Facing Starvation Declares Dr. Nansen

London.—Efforts to save 10,000,000 Russians from starvation will fail unless £5,000,000 is raised before Christmas, declared Dr. Fridtjof Nansen, in an interview with "the Daily Herald. Dr. Nansen, who is in London for the purpose of further ing measures for relief of Russia as secred that the solution of the world problem of unemployment was to be found in combating famine in that country.

Dr. Nansen praised the nations which already have sent assistance, but declared this aid was not nearly enough to meet necessities.

"It is a pity," he said, "that with Argentina burning her spare grain in furnaces, wheat rotting in the U.S., and Canada's bins bulging with 2,000,000 or more tons of grain than she can use, these Russian millions should die of starvation."

Dr. Nansen argued that, apart from humanitarian reasons, it was entirely in the interest of British business men to protect Russia from disaster, open a wider field of trade and enable the Russians to work. Dr. Nansen recently stated to newspapers that, despite much advertising and constant appeals British subscriptions to the Russian famine fund had been only £22,000.

Riga.—Russia's total grain yield, according to the Rosta Agency, will be two billion poods. Deducting from this a half billion poods for seed for the next harvest remaining one billion and a half will be sufficient to feed to population and there will have to be fifty million poods imported from abroad. The Soviet representatives in New York and London have been ordered to immediately convert into foodstuffs all donations for the famine sufferers. The famine committee has signed an agreement with the Dutch North American Mennonites with regard to famine aid.

PROFITEER RETAILERS IN BRITAIN BEING OPPOSED BY PUBLIC BODIES

London.—Public bodies are now taking up a campaign against the alleged profiteering by retailers whose prices do not correspond with recent cuts announced by wholesalers.

The corporation of the city of Cardiff, Wales, has decided to carry on an investigation into the affairs of certain shopkeepers after an announcement by the Lord Mayor that he was buying frozen meat at four and one-half pence per pounds for distribution among the distressed. Butchers are charging the public from 18 to 20 pence per pound.

The town of Neath, Wales, has instructed the markets commission to inquire into the local prices for meat and bread.

The Ministry of Agriculture in its weekly meat report shows that the decline of prices for fat cattle during the past week was the heaviest recorded since the Corresponding fall in prices in the wholesale meat prices have occurred as has also the prices for sheep, lambs and mutton.

Honor For Manitoba Doctor

Rockefeller Foundation Awards Fellowship to Dr. R. D. Kitchen, Souris.

New York.—Dr. Robert D. Kitchen, of Souris, Man., has been awarded a fellowship by the Rockefeller Foundation, for post graduate study of international medicine. Dr. Kitchen is a native of Brandon, Man. He will return to Winnipeg as a member of the faculty of the University of Manitoba in the department of internal medicine.

Dr. Jos. A. Hutcheon, assistant secretary of the Superior board of Health, of the province of Quebec, and Professor of Hygiene in the University of Montreal, has also been granted a fellowship for the study of medicine and public health in the U.S.

Western Canada's Coal Situation

Report Shows Dealers Have Not Been Buying Heavily.

Calgary.—According to a survey made by F. E. Harrison, inspector of the Dominion Department of Labor, and formerly assistant to Fuel Controller John Armstrong, a very serious coal situation confronts Western Canada. To indicate the nature of this, it may be stated that the production of one Alberta coal field alone—Drumheller—is one million tons short for the first nine months of the year to what it was for the first nine months of 1920. This implies that but very meager stocks have been laid up by dealers and consumers whereas last year, both classes were buying heavily in anticipation of the winter's needs.

Plague In British India

Hundreds Have Died and People Are Panic Stricken.

London.—Hundreds of persons have died of plague in the city of Jubbulpur, British India, says a despatch to the Daily Mail from Allahabad. The victims of the scourge are so numerous, it is said, that it is almost impossible to bury or burn the bodies of those who have died. The city is reported to be almost panic-stricken.

Jubbulpur is the capital of a district of the same name in Central India and is located about 200 miles southwest of Allahabad. It is usually a centre of trade and industry, the chief manufactures being cotton goods and carpets. It has a population of about 90,000, most of whom are Hindus.

Threshing News Helping Business

Reports Show That Retail Trade Is Improving.

Winnipeg.—The general improvement noticeable for more time past in manufacturing, wholesale and even retail lines, still continues. A week ago the feeling in the east was better than the west, but Saskatchewan and Alberta are unfolding news arriving, showing on the whole a bumper crop in most northern districts, has changed the complexion and the improvement is expected to continue from here on, says the weekly trade report of the Canadian Credit Men's Trust Association:

From the Maritime Provinces advices state wholesale trade is lightly, placing orders only and assorting business fair. Trade is more active in fancy goods than in staple lines. Manufacturers are feeling the result of low stocks in retailers' and wholesalers' hands, and expectations are for a still greater demand. Retail trade is fair. Collections are delayed until the crops reach the markets.

Montreal and Quebec reports say: Purchases of wholesalers are not too large, but a large number of orders are in. Manufacturers state trade is fair. Retailers are quiet, but improving. Collections are slow. There were 25 failures in Montreal district during the week.

Toronto reports little change in general conditions. Wholesale houses including drygoods, boots and shoes and ladies' and men's wear are busier. Retailer trade is about the same as last week. Manufacturers find little change.

Winnipeg wholesalers find business on the up grade, especially in boots and shoes, drygoods, hardware goods, underwear, etc. Retail trade is brighter and trade is improving, say retailers. Collections are slow.

Flooding Of Steamer Still A Mystery

Hull of Canadian Importer Found to Be Intact.

Victoria, B.C.—Cause of the flooding of the engine room of the steamer Canadian Importer, of the Canadian Government Merchant Marine, which disabled the steamer more than six hundred miles off the Oregon coast, while the vessel was en route from Vancouver to Sydney, Australia, still remains a mystery.

The vessel was put into dry dock at Esquimalt and this morning an examination of the vessel's hull found her to be intact and her sea valves in perfect working order.

Assent to Peace Treaty.

Berlin.—The Imperial Council has officially notified the Reichstag of its assent to the peace treaty with the United States without modifications. After this formality the treaty will be officially published and acquire legal force.

For Classic Road Race.

Saskatoon. — Announcement has been made that the Cairns' steeple chase, the classic road race of three miles in Saskatchewan, would be run on Oct. 19, this year. Invitations are being sent to runners at over the west to compete in the event.

Instrumental Music And Christian Unity

(By O. E. Payne, Hanna, Alta.)

The dominant issue in Christendom today is the unity of believers. All important denominations, except the Roman Catholics, and nearly all the minor ones, are actively participating in conference looking to that goal. The discovery of a true and acceptable platform which will serve as a basis is one of chief quests, while the removal of any obstacles to such unity is of no less concern. Question of creed, ordination, form of organization and government, and the title to property are important factors, but in the minds of both abolitionists and fundamentalists, the question of baptism looms above them all.

There is another issue, not so grave, to which the attention of only the few has as yet been drawn. Omitting the Latin Church, there are almost no sane Christians who reject instrumental music as sinful as there are who employ it and regard it as spiritual. Those who oppose it do so from principle. They will not sacrifice it, will not worship or have fellowship with those who do, and they base their scruples upon the Scriptures.

Such concede that instrumental music was authorized in the old Testament, but not in the New, and insist that we are to be guided alone by the latter. They hold that while there is no affirmative prohibition of such music in the Christian Scriptures, they allege that they are on safe and sufficient guide, and that their supposed silence amounts to a prohibition.

As matters have stood, the theorist few have realized that this situation constitutes an impasse that must shortly block all progress toward unity, and that the parties who forego instrumental music constitute two or three hundred millions the largest of the dozen or so bodies which do hold to the Greek Church, to which almost three belong, which church is actively laboring for unity.

Many have resorted to twist to a way of escape, but it must be admitted that they have left the riddle unsolved. The King James Bible and the revision which sheds no new light on the former as regards this question, have seemed to confirm the wholly accepted incidence that the New Testament is silent as to instrumental music and that such music is an innovation.

But all that is changed by the appearance of a remarkable book which has just been loaned from the pen of O. E. Payne, of Hanna, Alberta, which is being received with much favor by the revision which sheds no new light on the former as regards this question, have seemed to confirm the wholly accepted incidence that the New Testament is silent as to instrumental music and that such music is an innovation.

But all that is changed by the appearance of a remarkable book which has just been loaned from the pen of O. E. Payne, of Hanna, Alberta, which is being received with much favor by those who have conscientiously refrained from using such music. The book is entitled, "Instrumental Music Is Scriptural," and, in a new masterly way that amounts to a demonstration, it will also proceed to show that the New Testament is not silent upon the question, but that Christians are as distinctly directed to employ instruments in praising God as they are by words of song. The inspired writers employ two Greek verbs, ado and psallo, to tell us what manner of music to employ. By the consent of all, the first means to sing. As to psallo, its author quotes definitions from a hundred Greek lexicons covering more than twenty centuries, proving that it means to play an instrument. Every important lexicon is included in the long list. Then, to guard against the possibility of the lexicons erring, about one hundred and fifty examples of the use of the word are gleaned from Greek writers of the centuries before, at the time of and after the period in which the New Testament was being written. About thirty of these excerpts are from contemporaries of the Apostles, in which the context proves to a certainty that the authors used the word to refer to instrumental music.

Having in these and many other ways established the fact that psallo signified the playing of an instrument, and that therefore when, in Greek, Christians are directed to "sing and psallo," they are told to "sing and play," the author proceeds to prove by that from the first, translators have so understood the words. A century after the New Testament was written the Peshito, the first known translation, which Dr. Ely Schaff terms "the queen of versions," because of its accuracy, was from the Greek to the Syriac. Throughout it renders the Greek psallo as meaning play instruments. A Coptic translation is like way to also cited.

Four hundred years ago Luther pursued a like course, translating the Greek into "singet und spielet," which, in German, means "sings and play." The several revisions of Luther's great translation continue this rendering as do many other German translations, and all the Danish, Swedish, Norwegian and Dutch translations the author was able to find. It is thus shown that the common English version are exceptional in rendering the two words "sing and make melody," while Rotherham's English and most other modern European translations agree with each other and the best scholars in rendering the verbs to sing and play.

In thus removing the cause for scruples which many had, the impasse as regards music toward which the world-wide unity movement is rapidly traveling, the author of this work, which is the outcome of years of research in the libraries of two continents, has earned the thanks of Christendom.

The book is equally adapted to the learned and unlearned, and the author, O. E. Payne, Hanna, Alta., deserves credit for the production of this interesting work.

Memorial Designs For Battlefield

Canadian Commission Has Received Report From Committors.

Ottawa. — The Canadian battlefields memorial commission has received a report of the professional assessors from the competition design submitted for eight memorials to be erected on the battlefields in France and Belgium. The competition has been in progress during the past year, and has been participated in by leading architects, sculptors and artists generally. The decision reached by the commission will be communicated to the Governor-General in Council, after which the name of the successful sculptor will be announced.

In the first stage of the competition, the acts or designs were submitted, and of these 17 were selected for the second stage. The models have all been thoroughly examined by the commissioners.

Unique War Memorial.

Victoria, B.C.—Lieut. Governor W. C. Nichol recently planted the first tree of what it is claimed will be one of the outstanding war memorials of the Empire, in the form of an avenue, which when completed, will contain one tree for each British Columbia soldier who lost his life in the great War. A name plate will be embodied in the base of each tree.

H. B. Way, Publisher of the Chronicle, Lampman, Sask.

WESTERN EDITORS

Fall Rye Supplied To Alberta Farmers

Edmonton.—Fall rye has been supplied to farmers in Southern Alberta by the Department of Agriculture to the extent of 19,848 bushels. There were 747 applicants, who were furnished fall rye at an average rate of nearly 42 bushels per man.

More than half the total quantity was supplied to farmers in the Medicine Hat district. Good soil conditions are reported in the greater part of the dry belt.

Britain and France To Pay Largest Share of Expenses

Geneva.—Great Britain and France must pay the largest proportion of the expenses of operating the League of Nations, it was found when the committee charged with determining the share each country should pay reported to the assembly of the league. Each must pay 9.26 per cent., while China, India, Italy and Japan were placed in the second category and were called upon to pay 6.65 per cent. In the third category were placed Argentina, Spain, Brazil, Rumania, Jugo-Slavia and Czecho-Slovakia, whose individual shares were fixed at 3.58 per cent. The scale was graduated downward to .21 per cent., which will be paid by Panama, Paraguay, Salvador, Costa Rica, Guatemala, Honduras and Liberia.

Consideration of an amendment to article 18 of the covenant of the League of Nations, which would exempt technical treaties from registration with the secretariat of the League of Nations, was postponed by the assembly of the league here.

The purpose of the change in the covenant was to make article 18 effective in breaking up secret treaties through registration.

A. J. Balfour, of Great Britain, declared it was absurd to expect nations that signed a treaty or defense which they were ready to register and make public, to be required, at the same time to disclose the nature, military or otherwise, by which they contemplated making their defense.

No Outsiders In U. S. Merchant Marine

One of Best Pursers Discharged Was a Canadian.

New York.—A few days ago, 200 members of the crew of the steamer George Washington were discharged on the ground that they were not citizens and their places taken by Americans. I could "qualify on that ground." One of the men ousted was W. H. P. Mattenson, a Canadian, who was purser on the vessel. Mattenson was regarded as being one of the best pursers that ever left the service, but the rule of the United States Merchant Marine is "no outsiders need apply."

Sales Tax Necessary

All Have to Pay Share of Financial Burden.

Toronto.—Explaining the necessity for a sales tax, Sir Henry Drayton, Minister of Finance, addressing the Retail and Cafe Manufacturers' Association Convention, said Canada was carrying a heavy financial burden as an aftermath of the war and all had to pay a share either direct or indirectly.

Fur Farming.

Canada now has 582 fur farms. The boom has gone, but steady progress has remained. The business of fur farming has its monthly magazine of its own. Its monthly proportion of fur-bearing animals is one with a great future. Twenty years hence, most of our furs may be farm produced.—Toronto Mail and Empire.

Patronize your local merchant and thereby help to build up your home town and community.

Conference Will Debate On Improvement Of Canadian Livestock

Developing Power In Manitoba

Winnipeg.—Frazer, Brace and Company, contracting engineers, of Montreal, have been awarded contracts for the construction work on the $10,000,000 power development scheme at Great Falls, on the Winnipeg River, 36 miles here, by the Manitoba Power Company, Limited.

Development work is already under way, with about 200 men employed, and immediate employment for an additional 200 men will be found. Ultimately, 1,000 to 2,500 men will be required to push work as rapidly as possible.

Manitoba Societies Will Extend Credits

Total Outstanding Loans Amount to Over Two Million.

Winnipeg.—Rural credits societies of Manitoba will be forced to extend time for payment of $1,000,000 of farmers' notes until next fall, according to information obtained here. Total outstanding loans of the societies amount to $2,600,000. It is expected $1,500,000 of the loans will be collectable this fall and new notes passed this 1922 will be accepted for the balance.

Excessive rains which held up threshing operations and lowered prices of grain and livestock are the reasons the societies are unable to make full collections this fall.

Allege Disabled Men Badly Treated

Victoria G.W.V.A. Ask Investigation of S.C.R. Medical Treatment.

Victoria, B.C. — The Victoria branch of the Great War Veterans Association has passed a resolution requesting the Dominion Government to investigate the medical department of the soldiers' civil re-establishment in British Columbia, charges were made at them meeting of "failure in treatment" of disabled Victoria men sent to the S. C. R. doctors in Vancouver for examination. The organization went on record as opposed to the effort of the provincial command to influence branches against the principle of amalgamation with other ex-service bodies.

Boundary Waters To Be Divided

Commission Reaches Compromise Regarding St. Mary and Milk Rivers.

Ottawa.—The substance of the order adopted by the International joint waterways commission is setting the St. Mary and Milk Rivers question is that the waters that cross the boundary are to be divided equally between the two countries after the United States has taken its priority from the Milk River, and Canada has taken its priority from the St. Mary River.

The St. Mary and Milk Rivers matter has been in controversy for many years. At the various hearings of the commission, two quite different interpretations were put on the provisions of the treaty relating to those two rivers by counsel representing the two countries.

The commissioners' decision is in the nature of a compromise, which substantially preserves the interests of both Canada, in Alberta, and the United States, in Montana.

Could Not Absorb Number Proposed

Australia's Premier Says 20,000 Emigrants All They Could Handle.

London.—A Reuter cable from Melbourne says that Premier W. M. Hughes referring to an interview with the Australian emigration agent cabled from London who is alleged to have recommended the despatch of 100,000 emigrants yearly to Australia from the British Isles said it would be folly to pour such a population into Australia until adequate arrangements have been made for making them wealth producing. Premier Hughes thinks the figure quoted is absurd. In his view, the practical position is that from 12,000 to 20,000 might safely be sent out this year.

Prize For Cancer Cure.

New York.—A prize of $100,000 for the discovery of a medicinal remedy to relieve cancer has been offered by an anonymous doctor through the Cosmopolitan Cancer Research Society of Brooklyn.. Requirements of the award call for method of treatment formulae and full information with therapeutic proof in at least 50 cases.

Ottawa.—A conference of ... means to discuss the best means ... improving the health of Canada's ... livestock, is to be called, at Ottawa ... for Nov. 15 and 16. Probably no ... livestock producing country in the ... whole world has a better record for ... freedom from disease than has Canada, said Dr. Grisdale, deputy minister of agriculture, a condition undoubtedly largely due to the inspection system carried on by the department's health of animals branch. The work of keeping Canadian stock free from disease and giving it an even finer reputation than it now enjoys is not to be done by individuals or small groups in this work, says Dr. Grisdale, which must be done by a centralized organization for all Canada. Accordingly, serious consideration will be given at the forthcoming conference to the formation of a national veterinary association to work in connection with the department.

Representative veterinarians from every province in the Dominion will be invited to attend the conference.

The estimated value of Canadian livestock today is $1,078,262,000, and the department believes that any effort to enhance this great national asset must be to the advantage of the whole country.

French Competition For Aviation Motor

All Countries May Enter for Prize of Million Francs.

Paris.—The French committee for aeronautic propaganda has decided to create a prize of 1,000,000 francs for the commercial aviation motor which best satisfies tests, in a competition to be arranged, in point of durability, regularity, simplicity, dismounting and upkeep.

The competition will be international, under the regulations of the International Aeronautic Federation, but a foreign builder taking part must engage to construct his motor in France if he wins. Motors should be ready by June 1, 1923, and the Aero Club of France has been entrusted with carrying out the competition.

Oil Light Beats Electric or Gas

Burns 94% Air

A new oil lamp that gives an amazingly brilliant, soft, white light—better than gas or electricity, has been tested by the U. S. Government after 35 leading universities and found to be superior to 100 other lights. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns common oil 94% common kerosene (coal-oil).

The inventor, T. V. Johnson, 595 McDermid Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get one quickly, and without experience or money make $200 to $500 per month.

Many Killed In Train Wreck

Cars Take Fire After Collision In French Tunnel.

Paris.—Seventeen of those injured in the tunnel wreck have died in hospitals, according to Havas Agency, bringing the total number of dead up to 35. Exploration of the 17 burned cars has not yet been possible, and it is feared that they contain additional victims.

Paris.—A rear-end collision of two suburban trains in the Batignolle tunnel leading to the St. Lazare railroad station led to terrifying scenes and the death of many persons bound on their homeward journey from Paris. The wrecked cars burst into flames, and the disaster was made all the more terrible by the explosion of a gas reservoir.

Finds England Depressed

People More Cheerful During War Says Dr. Chown.

Toronto.—Dr. S. D. Chown, general superintendent of the Methodist Church, who has just returned from the Ecumenical Conference in London, declares that he has never seen England looking so depressed.

"I have been in London under a German raid," said Dr. Chown, "and in the midst of the vicissitudes of the war, but even under those conditions the people seemed to be exhilirated as compared with their present mood."

Building Material For France.

Wiesbaden.—An agreement whereby the German Government is to deliver to France within three years seven billion gold marks' worth of building materials, was signed here by Louis Loucheur, French minister of the liberated regions, and Walter Rathenau, German minister of reconstruction. The signing consummates a tentative agreement drawn up by them last September.

THEN AND NOW.

THE HERALD.

Published at Ponoka, Alberta, every Friday morning.

Asker

J. Ramsey had the misfortune to lose a number of cattle by blackleg last week.

The school pupils took a good supply of exhibits to the fair last week-end, and were well rewarded by a large number of prizes.

Some of the old-timers attended the funeral of M. Embertson, of the Malmo district, last Sunday. Mr Embertson was well known through the district, having resided near Asker for the last thirty years.

Come to the U.F.A. meeting on Monday, October 17, and hear Mr Smith speak on the dairy business.

Buckhorn

Threshing is well under way in the Buckhorn district, and judging by the smiles on all the farmers' faces the results seem to be quite satisfactory.

Chris. Collis has returned to Ponoka after spending the week at home.

A party of young people gathered at the home of Mr and Mrs C. J. Eley in honor of the birthday of Mr Eley's niece, Miss Ferne Anderson, on Saturday evening. A jolly time was spent by all.

Mr and Mrs Burton Davidson spent Sunday last at the home of Mr and Mrs Swan Borg.

Hall Ogilvie and family visited Broad View Ranch last Thursday evening, and had a very enjoyable afternoon. Skunk hunting was on the programme.

Anton Borg took in the Dance at Ferrybank last Friday

If you heard the calm peace of the evening air broken suddenly by the sound of a young man's voice singing melodiously

"My love is but a lassie yet.
A lovely lightsome lassie yet,"

would you think the said young man had seen "something in the bottle," or that he had just escorted the aforementioned "lovely lightsome lassie" home?

A dance will be held in Crystal Springs school on Friday, October 28th. Proceeds to be used in aid of the Christmas Tree. Ladies please bring refreshments.

ALBERTA WHEAT IS GRADING HIGH

Calgary, Oct. 10.—Over 300 cars of grain are being moved daily by the C.P.R. from country points in Calgary district, and this average has been maintained during the past few days, according to officials of the railway in Calgary. Most of these shipments are for the head of the lakes, although a few are for points in B.C. It is interesting to note that many cars are being billed to mills in the interior.

Inspections of grain by George Hill, government inspector at Calgary, show that the high average of early shipments is being maintained and Alberta's crop will average very high this year. Reports from the north show that grain produced there this season is grading higher than ever before, and, taken all over, Alberta will most probably have the highest grading in all Canada.

Very little tough grain has been submitted for inspection of the local government office, and although the yield was lighter than anticipated, much has been made up for by the high quality of the crop.

GREAT CANADIAN SOLDIER COMEDY COMING TO THE EMPRESS

The sensational Canadian comedy drama which has been breaking nearly all the local attendance records in western towns and cities, will play here at the Empress theatre next Monday evening, October 17, when the theatregoers of this town will have an opportunity to see the liveliest and most humorous play ever written on the life of the Canadians in France.

"Mademoiselle of Armentieres" is known to every Canadian who went overseas and by the general public as well, and now the name is being further perpetuated and popularized by means of a first-class entertainment by that name, written and acted by men who fought with the Canadian corps in France. The attraction comes here after a highly successful run throughout western Canada where capacity houses have greeted the play in every town and city.

Ottawa, Oct. 10.—Those holding grazing leases in Manitoba, Saskatchewan, Alberta and the Peace River block, British Columbia, are now entitled to four years' notice, in the event of their having to relinquish the land, instead of three years, as heretofore. The regulation has been made by order-in-council on the representation that three years is not sufficient time in which to enable a rancher who receives notice of cancellation, to bring his stock to maturity or to dispose of them to advantage.

M. M. Mecklenburg, the well-known Edmonton eyesight specialist, is leaving for Grande Prairie and Peace River oil fields. If not killed while flying, will be here again on November 20.

Quality maintains economy. No matter how much you pay "per gallon" for other lubricating oils you get more lubrication "per dollar" when you buy Imperial Polarine Motor Oils.

Maintains Economy

IMPERIAL Polarine Motor Oils save many thousands of dollars every year for Canadian motorists because of reduced operating expenses.

Imperial Polarine Motor Oils cut down repair and maintenance costs, reduce fuel bills and insure you for all time against excessive depreciation and repair expenses. Imperial Polarine quality *maintains economy* all along the line.

Judged by quality—gauged by actual miles of perfect lubrication each gallon will give, and by real motoring satisfaction, Imperial Polarine is the least expensive motor lubricant that you can obtain. The more carefully you check up costs, the more thoroughly convinced you will be of the advantages of using Imperial Polarine Motor Oils *exclusively*.

Standardize on the *correct grade* of Imperial Polarine Motor Oils. Consult our Chart of Recommendations at your dealer's or write to 59 Church Street, Toronto, for our interesting booklet, "Automotive Lubrication."

IMPERIAL OIL LIMITED
Branches in all Cities

For a Clean, Efficient Motor

Clean out your crank-case every thousand miles or less. Imperial Oil dealers displaying the sign shown on the right will flush your crank-case with Imperial Flushing Oil, a specially prepared cleaning agent for crank-case cleaning purposes. You save money in longer life and more efficient service from your motor by using this service.

World Happenings Briefly Told

Statistics from the C.N. and C.P. Railways show that 70,000 grain cars were distributed on the prairies during the present season.

Capt. A. J. Bierre, master of the Vancouver tug Commodore, and one of the oldest seamen in these waters, dropped dead on his boat at Prince Rupert.

Inheriting $75,000 from his brother's estate failed to disturb the mental poise of a New York letter carrier. He continued on his rounds after receiving the news.

The four non-permanent members of the Council of the League of Nations, Spain, Belgium, China and Brazil, will be re-elected. The committee on internal organization *ad* decided unanimously.

The new automobile route between Port Arthur, Texas and Port Arthur, Ontario, which covers the Mississippi River scenic highway and the Port Arthur highway, has been officially opened.

Losses in earnings of workers throughout the U.S. during the past fiscal year, due to involuntary idleness, were put at more than $6,500,000,000 in an estimate prepared by economic experts of the national conference on unemployment.

Formation of a committee to raise a $1,000,000 fund for annual musical scholarships and prizes as a memorial to Enrica Caruso was announced by Dr. Antonio Stella, temporary chairman of the Caruso American Memorial Foundation.

R. C. Harvey, of Lethbridge, has leased, through G. R. Duncan & Co., the large freight warehouse on the banks of the Kaministiquia River, owned by the Canadian National Railway, and will use it for feeding 10,000 sheep, which he will fatten on the screenings from the elevators.

An airplane crashed near the Manston airdrome from a height of 200 feet and a flying officer and four mechanics were killed. A strong wind was blowing at the time and the machine burst into flames. A sergeant of the air force ran to the blazing machine in an attempt to rescue the men in the wreckage, but the flames drove him back.

Christmas In The Old Country

Christmas is a wonderful time to visit the Old Country, renew old acquaintances and have Christmas dinner at home. It is the one season of the year when the old family table is stretched to the limit and loaded with the best in the land for the yearly family reunion.

This is indeed a year for a reunion, and why should it not be complete. Every convenience in comfort and service is offered by the Canadian Pacific Railway. Through tourist sleepers will be operated from Edmonton, Saskatoon, Calgary, Moose Jaw, Regina and Winnipeg, thus making it possible to go direct to the port of sailing without change or delay.

Tourist sleeping cars will leave Calgary, November 11th, 12th, 21st, 22nd, December 6th and 9th. From Edmonton, November 10th, 12th, 20th, 21st, December 5th and 8th. From Saskatoon, November 11th, 12th, 21st, 22nd, December 6th and 9. From Moose Jaw and Regina, November 11th, 12th, 21st, 22nd, December 6th, 9th and 11th. From Winnipeg, November 12th, 14th, 22nd, 23rd, December 7th, 10th and 12th.

A postcard to any Canadian Pacific Agent will bring full particulars regarding rates, passports and reservations. R. 12

West Australia's Wonderful Caves

More extensive than the labyrinths of the Mammoth Caves of Kentucky, one richer in stalactites than the Bombay Caves of Elephanta are the Jenolan Caves of West Australia, pronounced the finest underground wonderland of the world.

Ladies Remove Their Corns In a Very Simple Way

No pain, no trouble, costs only a quarter. It is a very simple thing to paint on a small application of good old "Putnam's" night and morning. To remove corns, to get entirely free from them, use Putnam's Corn and Wart Extractor. It is guaranteed. 25c at all dealers. Refuse a substitute.

Wonderful Old Age

It takes one woman 20 years to bring up her son—and another woman all the rest of his life to bring him down a little.—Helen Rowland.

Not To Be Caught.

Brown was a testy fellow, and if there was one thing more than another that he hated it was to be caught. As a consequence, he was very suspicious of any deed or word the meaning of which he could not understand. Once when he visited a menagerie he had an interesting chat with one of the keepers, and as he was about to leave the man asked: "By the way, sir, have you seen our black-faced antelope?"

"Ah," thought Brown, "he's trying to make a fool of me. "No," he replied stiffly. "May I ask with whom your black-faced aunt eloped?"

Our slogan for the coming year should be, "Buy at Home." Add to your own and your neighbor's prosperity by keeping the money circulating in our own district.

A French expert declares that the chances of mistake in identification with finger prints are one in 17,000,000,000.

French railway engineers have found that the wood of the mangrove tree is rot-proof.

Why Must it Be Zam-Buk?

—because in skin troubles, Zam-Buk has this great advantage over ordinary ointments, salves and lotions. It is wholly medicinal and perfectly free from mineral drugs or animal fats.

Zam-Buk is a highly concentrated herbal preparation, and owing to its unique composition possesses Soothing, Healing and Antiseptic qualities of rare power. Zam-Buk also combines the three virtues of Simplicity, Effectiveness, and Safety. It is always ready for use, always reliable and absolutely pure.

Doctors, Nurses, and Dressing experts who have subjected Zam-Buk to practical tests declare it to be wonderfully effective in superficial wounds and obstinate skin diseases. It makes for the immediate alleviation of pain and burning skin irritation. It drives out skin disease *at the roots* without damaging the delicate flesh tissues. It gives instant protection against germ-infection and blood-poison, and promotes the quick growth of healthy new skin.

For Husband, Wife and Child, Zam-Buk is the one perfect skin healer. Regular users declare it to be worth its weight in gold. 50c. all druggists and dealers, or Zam-Buk Co., Toronto

Electric bulbs can be frosted by dipping them in a strong solution of Epsom salts and vinegar. This softens the glare of the light.

Dyed Her Sweater And Silk Stockings

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything blue new. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

Sardonic Suggestion.

"I guess I'll knock off work for a day and go fishing," remarked the man who is always weary. .

"This is the fourth time you have said that this week," commented his wife. "Just for variety why don't you knock off fishing and go to work."—Washington Star.

After 10 Years of Asthma

Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user—and this is but one among many. Little wonder that it has been known as a recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it to-day, as it has done for years.

And He Got It.

An English schoolmaster promised a crown to any boy who should propound a riddle that he could not answer. After many had tried, a small boy presented: "Why am I like the Prince of Wales?" The schoolmaster puzzled his wits in vain, and was finally compelled to admit that he did not know. "Why," said the boy, "it's because I am waiting for the crown."

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Irrigation Agriculture

Courses Will Be Held in Alberta This Winter.

Courses in irrigation agriculture to farmers and farmers' sons are to be given in various parts of Southern Alberta during the coming winter. Each course will last about a week and lectures by some of the leading irrigation experts in the country will be a feature of them. The Provincial Department of Agriculture is responsible for these courses, which are expected to prove very popular among the large number of farmers in Southern Alberta interested in irrigation.

There may be other corn removers, but there will not be completely satisfied until you have used Holloway's Corn Remover.

Aboriginal Chronometers

Time and Distance Are Reckoned In Queer Ways.

The hill people of Assam reckon time and distance by the number of quids of betelnut chewed; while the native Filipinos measure distance by the number of cigarettes a man will smoke in traveling from one point to another. According to the author of Knickerbocker's History of New York, the Dutch Assembly on Manhattan Island was invariably dismissed at the last puff of the third pipe of Governor Wouter Van Twiller.

"Danger Ahead."

Teacher.—Johnny, if you don't behave I'll have to send a note to your father.

Johnny.—You'd better not. Ma's as jealous as a cat.—American Legion Weekly.

At Night or in the Daytime.

Farmer Wheatbeard.—Your hired man, Josh, walke in his sleep, don't he?

Farmer Corniosset.—I hope so; the poor fellow needs exercise.

The chief enemy of the fox raisers of Alaska is the eagle which swoops down on the pups as they sport about in the open.

Many sailors have a prejudice against ships whose names begin with "T."

There are 6,449,39 farms in the United States, of which 2,768,591 are of more than 100 acres.

Keep Minard's Liniment in the house

SUNDAY SCHOOL LESSON

LESSON FOR OCTOBER 16.

PAUL WRITES TO THE CHRISTIANS AT CORINTH.

I. Party Spirit in the Corinthian Church (1:10, 11).

In this church rival factions were contending against each other. Some were for Paul, some for Apollos, some for Peter, and some for Christ. The cause of the condition was a failure to see that the membership composing the body cannot be divided. By one Spirit all were baptized into the one body (12:13).

II. Love the More Excellent Way (I. Cor. 12:14-31).

All of the Spirit's gifts are good, but the most valuable of all is love. Not all can preach or interpret tongues, but all can have the gift of love. Love in this chapter is the more excellent way of chapter 12:31.

(1) The Pre-eminence of Love (vv. 1-3). It transcends (1) speaking with tongues. For men to possess the loftiest eloquence and be lacking in love is to be as booming brass and clanking cymbal.

(2) The gift of prophecy—the ability to unfold mysteries. To be able to penetrate the mysteries of nature and providence is good, but to love is better.

(3) Faith of the most vigorous kind, even such as to remove mountains, is of less value than love.

(4) Philanthropy of the most generous sort, causing one to surrender all earthly goods for the sake of the poor is praiseworthy, but unless actuated by love is valueless before God.

(5) Heroic devotion which leads to martyrdom is profitless unless backed by love.

2. The Attributes of Love (vv. 4-7). (1) It is long-suffering and kind.

(2) It is free from envy. Those who love are entirely free from the spirit engendered because of the superior worth and success of others.

(3) It is free from boasting and vanity. Love strives to do good to all and is not careful to seek their admiration and applause.

(4) It is decorous. Love is always polite and mannerly; knows how to behave at all times.

(5) It is unselfish. It is always seeking the good of others and is forgetful of self.

(6) It does not give way to passion. It does not allow itself to be aroused to resentment. It is not quick tempered.

(7) It takes no delight in evil; does not impute evil motive to others; is not suspicious. It is forgiving. Love is not glad because of truth that which is evil, but sympathizes with that which is true; has a common joy with it.

(8) It beareth all things. It wraps itself in the gracious mantle of love and shuts all evil out.

(9) Love is trustful; it looks into the future with confidence.

(10) Love is hopeful; it seizes the things of the future and brings them into the present, appropriating them for its use.

(11) Love is firm. It is free from vacillation. It intelligently sets its attention to things that are right and with unvarying strength holds fast.

3. The Permanence of Love (vv. 8-13). (1) It outlasts prophecy. Prophecy in the Scriptures means both a foretelling of events and the teaching of the Word of God. Prophecy as prediction shall be fulfilled prophecy as teaching shall be brought to an end in that day when teaching is not needed (Heb. 8:11; Jer. 31:34).

(2) It outlasts speaking with tongues. The race once spoke the same language, but as a judgment for sin and rebellion God brought confusion and caused the people to speak many tongues. The day is coming when the redemption wrought by Jesus Christ shall have been accomplished in all its fullness; all nations shall be brought back to one tongue.

(3) It outlasts knowledge. The knowledge we now have is only relative, but the day is coming when this relative knowledge shall be done away by the coming in of a wider and nobler intelligence; the twilight shall be lost in maturity, for at Christ's coming we shall see Him face to face and shall be like Him. Love will always abide, for God is love.

England Wants More Hens.

England needs 8,500,000 more hens in order to get back to the estimated consumption for 1913 of 120 eggs per person, asserts Edward Brown, secretary of the National Poultry Council. Mr. Brown says that in the United States and Canada it is stated the average consumption is nearly 200 eggs per unit annually. Basing his estimates on the recent census figures for Great Britain, he computes that each person in England last year ate 93 eggs.

In Stock.

Customer.—I would like to see some cheap skates.

Saleslady.—Just a minute; I'll call the boss.—Carnegie Puppet.

The first hydro-electric plant for commercial purposes was built at Frankfort-on-the-Main in 1894.

Rusted Metal.

If iron or steel is rusted you can loosen the rust by wrapping a cloth soaked in paraffin around it.

A whale's throat is so small that you could choke him with your fist, and he feeds on the smallest things in the sea.

A Handsome Ermine Wrap

By Marie Belmont.

A sumptuous fur wrap is always a serviceable addition to the fashionable woman's wardrobe. This season there are many appealing creations in styles that are decidedly distinctive. This model is made of ermine. It is elaborated with a rippling cape that swings from the back of the collar. The sleeves are very wide at the cuff. A most striking effect is attained by the use of a black fox collar. This reaches almost to the waistline, decreasing in size as it reaches this point. The black fur is also introduced on the lower edge of the cape, where it accentuates the ripples.

WELL SATISFIED WITH BABY'S OWN TABLETS

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. Experience teaches her that the Tablets are the very best medicine she can give her baby. They are a gentle laxative; mild but thorough in action and never fail to banish constipation, colic, colds or any other of the many minor ailments of childhood. Concerning them Mrs. J. Bte. Charest, St. Leon, Que., writes: "My baby cried continually and nothing seemed to help her till I began using Baby's Own Tablets. These Tablets soon set her right and now I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Trotzky Plans For Socialist Germany

Will Send Money to Silesia and the Ruhr Basin.

The Reval Investia says that Trotsky made an important speech at the last meeting of the Communist party in Moscow, in the course of which he declared:

"We are living with our necks in a running noose. The only issue offered to us is to create a sufficiently large base on the west. Hungary cannot offer us such a base, and we now need, therefore, a Socialist Germany. All our efforts must be directed to provoking a revolution in Germany. We will send 220,000,000 gold roubles to Silesia and the Ruhr Basin. We have reliable men there to carry out our plans."

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb. In worm virtue a bottle of it than can be fully estimated.

The city of Melle, Germany, has printed paper money which bears scenes of potato harvesting on one side.

BOVRIL
PREVENTS THAT SINKING FEELING

The Company Meal

BY LORETTO C. LYNCH

An Acknowledged Expert in All Matters Pertaining to Household Management.

There are times when the mistress of the home wishes to prepare something a little different and a little more expensive because "company is coming," and she wants suggestions as to the unusual. Of course, it is better to plan a few expensive dishes than to try to serve many mediocre ones that require much time to prepare and find the hostess quite worn out upon the arrival of the company.

For a mixed company with those tastes you are not entirely familiar a fruit cocktail makes a good starter. Most people like fruit, while there are some who do not care for the seafoods and some places where the seafoods are not obtainable. It has been my observation that the manner of serving has quite as much to do with the success of a fruit cocktail as has the content. The tall, stemmed cocktail glass is ideal. One of the shops was showing some of these glasses with a heavy gold border at the rim. It was of the tiniest glass with a pretty design running through it.

Practically any of the fruits combine well in a cocktail. The banana, however, is likely to discolor if the mixture is exposed to the air for any length of time. One particularly attractive fruit cocktail is made by soaking the prepared pieces of orange, grape-fruit and pineapple in grape juice for an hour or so before sprinkling with powdered sugar. The fruit should be lightly heaped into the chilled glasses, the fruit itself being thoroughly chilled before serving. The glass is stood upon a small plate previously covered by either a lace or one of the pretty paper doilies. The fruit cocktail is set before the meal is announced.

Asparagus soup is liked by most people. This may either be made from the fresh or the canned vegetable. The asparagus is cooked until it is soft enough to be forced through a strainer. The stock so obtained is measured. There should be half a measuring cup for each serving. As much milk as there is stock is added. For six cups of liquid add two level tablespoons each of flour and butter rubbed together until smooth. Cook, stirring until the mixture boils.

The soup may be served either in soup dishes or in bouillon cups. The prettier the cups the more appreciated will be the contents.

Fairly stale bread may be cut into slices and then into tiny cubes and set on a plate in the oven or broiler to toast. These are either passed with the soup or sprinkled over each individual soup cup before serving. Small crackers are also suitable with soup instead of the toasted bread cubes.

The main course comes next. Fried breasts of chicken with tiny sifted peas is a good choice. It is better than roast beef or beefsteak in that the hostess does not have to figure out if one guest will like the meat rare, another well done and so on.

If you select broiler chickens, have the butcher cut off the breasts of as many chickens as you have guests. If you buy roasting chickens, have but half as many breasts as there are guests. The remainder of the chickens may be cooked in any desired way and used up at some of the other meals prepared for the family on non-company days. Put the breasts should be wiped off with a damp cloth, then sprinkled with salt and pepper. Each should be dipped in beaten egg and either sifted bread or cracker crumbs. The breasts thus prepared should be fried in deep fat until a golden brown. Cream gravy, peas and French fried potato balls in nests of watercress are suitable accompaniments.

Ice cream and cake are liked by most people. Sponge cake is a particularly happy form of choice to go with ice cream. Even if you buy your ice cream you will probably want to make your own sponge cake. Into a bowl put the yolks of three eggs. Beat until light and lemon colored. Beat in three-fourths of a measuring cup of powdered sugar. Add two tablespoons of lemon juice to which a little grated rind has been added. Slip into the bowl the stiffly beaten whites of the three eggs. Upon these sift three-fourths of a measuring cup of flour, sifted before being measured. With a knife cut in the flour and egg whites. Bake in an ungreased pan in a moderate oven, ten to twenty minutes, depending upon the thickness of the cake and the shape of the pan.

Chinese astronomical records go back to 2356 B.C.

Anna Case Heard 300 Miles Away

Metropolitan Soprano Sang by Radio Telephone From 71st Regiment Armory.

Amateur wireless receiving stations in the irregular triangle formed by Montreal, Pittsburgh and Newport News, Va., were among the listeners when Miss Anna Case, of the Metropolitan Opera Company sang at the Electrical Exposition in the 71st Regiment Armory. The amateurs were notified by the National Amateur Wireless Association that Miss Case would sing to them by radio telephone and from stations all over the territory word was flashed back that they would be waiting for her voice.

"We'll hear her," came a message from one of the destroyers with the Atlantic fleet. And other ships far out at sea were able to listen to the concert. She sang "Ave Maria," and the song which has proved most popular on the phonograph, "Old Mother, My Love."

Miss Case sang into a transmitter which was set up in one of the tower rooms and the aerials lead to the top of the tower. There were several listening posts in the armory so that visitors to the show could hear her. Several stations within wireless distance of the armory said they were able to entertain audiences by means of amplifiers.

ASPIRIN
"Bayer" is only Genuine

Warning! It's criminal to take a chance on any substitute for genuine "Bayer" Tablets of Aspirin, prescribed by physicians for twenty-one years and proved safe by millions. Unless you see the name "Bayer" on package or on tablets you are not getting Aspirin at all. To every Bayer package are directions for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy in Boxes of twelve tablets cost few cents. Druggists also sell larger packages. Made in Canada. Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Have it always in the house

WISE mothers keep a jar or a tube of "Vaseline" White Petroleum Jelly in the house for many childish ills, such as bumps, bruises, chafed skin, cradle cap. It is soothing, healing and gratefful to the most irritated skin.

Be prepared for winter colds, too. "Vaseline" Camphor Jelly rubbed on the chest, and "Vaseline" Eucalyptol Jelly snuffed into the nostrils will check them quickly.

CHESEBROUGH MFG. COMPANY (Consolidated)

PETROLEUM JELLY

The foolish man who built his house on the sand—

He gave an example in folly which anybody can understand.

It isn't so easy, however, to sense the mistake of trying to build the body on foods which lack essential nourishment.

Here, again, is a foundation of sand which gives way when the test comes.

Many a food that tastes good lacks honesty of nourishment to equal its taste. Thus it tempts the appetite into mistakes that often are costly.

Grape-Nuts is a food which helps build bodily endurance for life's stress and storm. The full nourishment of wheat and malted barley, together with the vital mineral salts so necessary to bone structure and red blood corpuscles, with phosphates for the brain, is retained in Grape-Nuts. The long baking process by which Grape-Nuts is made gives the food a natural sweetness and an unusual ease of digestibility and assimilation.

Served with cream or milk, Grape-Nuts is fully nourishing, and whether eaten as a cereal at breakfast or lunch, or made into a pudding for dinner, Grape-Nuts has a particular delight for the appetite. Sold by grocers.

Grape-Nuts—the Body Builder
"There's a Reason"

BIG SHIPMENTS OF LIVESTOCK FROM ALBERTA TO U.S.

Large movements of livestock from Canada to the United States will commence this week, and it is expected that, unless there is a bad break in the Chicago market, the movement will continue for some time. On October 8 the special reduction of 20 per cent on freight for cattle came into effect and after allowing for the difference in exchange rates, about 9½ per cent in favor of the shipper, the return is much better than on cattle shipped across the Atlantic.

Recent quotations show that the British market price on Canadian steers has dropped considerably and shippers greatly favor the Chicago market as shrinkage is not so great when the cattle are shipped by rail on the shorter haul. As sales can be effected much more quickly this is considered another great factor in favour of the U.S market, although it is feared that the sudden rush of arrival from Canada may depress the prices for a day or two

WING-JENSEN

The marriage took place at the Manse, Wetaskiwin, on Saturday, October 1, of Miss Cora Jensen, of Wetaskiwin, to Mr D. David Wing, of Ponoka—Rev. J. M. Pritchard performing the ceremony. Mr and Mrs Wing will reside on their farm in the Dakota district.

Vancouver, Oct. 11—A crack in a bathroom pipe may have been the cause of the flooding of the freighter Canadian Importer, which drifted about the Pacific ocean for weeks disabled and waterlogged, was twice lost and found again, towed nine hundred miles to port, and then was found to be practically intact as far as her hull was concerned. In a Vancouver drydock today, workmen discovered a crack two and a half feet long in a bathroom pipe, where it passed through number 2 hold. The pipe pierces the water line just at the water line, and the crack in the pipe is just inside the "skin" of the ship. It is thought that this is where the ocean found ingress

Little Rock, Ark., Oct. 10—The largest diamond mined in the Arkansas field in Pike county was found last week, mining company officials announced today. The stone weighs 20.25 carats in the rough, and is estimated to be worth $10,000.

What Kind of Tariff Do You Prefer?

DURING the next few weeks the Dominion of Canada will be in the midst of one of the most exciting and important general elections in its history. For the first time three great parties will participate in the struggle, with the tariff as the paramount issue.

The whole country, and particularly the farmers, will watch with profound interest the tariff discussion between Premier Meighen, Mr. Crerar and Mr. Mackenzie King—the three party leaders.

AT no time in the history of the Dominion has it been more vitally necessary for every elector to be thoroughly posted on the issues of the day. Readers of the

Edmonton Journal

acquire an intimate knowledge of election issues based on impartial and unbiased reports of election meetings in every part of the Dominion.
